

TYPES OF ORGANIZED CRIME

When it comes to organized crime, how do you distinguish between groups? In its latest *Serious and Organised Crime Threat Assessment (SOCTA)*, Europol identified four key indicators for groups.

These identifiers, however, are not hard and fast rules for how groups could be differentiated; nearly two-thirds of the criminal groups analyzed in the 2021 SOCTA were composed of members of different nationalities.

NATIONALITY OR ETHNICITY

Chinese organized crime groups versus Russian organized crime groups.

CRIMINAL ACTIVITY

Property crime or human trafficking.

OTHER DESCRIPTIVE CHARACTERISTICS

Value systems, such as in motorcycle gangs.

STRUCTURE

Mafia-style versus street gangs.

"In some cases, classifying criminal networks according to national or even ethnic homogeneity can be relevant for an investigation because the nationality and/or ethnicity can be an important element in international collaboration," Europol said. "Strategically, the division of criminal groups according to ethnic homogeneity often lacks nuance."

Organized Crime: Culture, Markets and Policies Dina Siegel, Hans Nelen, 2007-12-16 Dina Siegel and Hans Nelen The term global organized crime has been in use in criminology since the mid 1990s Even more general and abstract than its daughter terms transnational or cross border organized crime global organized crime seems to embrace the activities of criminal groups and networks all around the planet leaving no geographical space untouched The term appears to cover the geographical as well as the historical domain global has taken on the meaning of forever and ever Global organized crime is also associatively linked with globalisation The social construction of both terms in scientific discourse is in itself an interesting theme But perhaps even more interesting especially for academics trying to conduct empirical research in this area is the analysis of the symbolic and practical meaning of these concepts How should criminologists study globalisation in

general and global organized crime in particular Which instruments and theoretical luggage do they have in order to conduct this kind of research The aim of this book is not to formulate simple straightforward answers to these questions but rather to give an overview of contemporary criminological research combining international national and local dimensions of specific organized crime problems The term global organized crime will hardly be used in this respect In other social sciences such as anthropology there is a tendency to get rid of vague and abstract terms which can only serve to confuse our understanding In our opinion criminology should follow this initiative
