Organizing at the Margins Jennifer Jihye Chun, 2011-08-11 The realities of globalization have produced a surprising reversal in the focus and strategies of labor movements around the world After years of neglect and exclusion labor organizers are recognizing both the needs and the importance of immigrants and women employed in the growing ranks of low paid and insecure service jobs In *Organizing at the Margins* Jennifer Jihye Chun focuses on this shift as it takes place in two countries South Korea and the United States Using comparative historical inquiry and in depth case studies she shows how labor movements in countries with different histories and structures of economic development class formation and cultural politics embark on similar trajectories of change Chun shows that as the base of worker power shifts from those who hold high paying industrial jobs to the formerly unorganizable labor movements in both countries are employing new strategies and vocabularies to challenge the assault of neoliberal globalization on workers rights and livelihoods Deftly combining theory and ethnography she argues that by cultivating alternative sources of symbolic leverage that root workers demands in the collective morality of broad based communities as opposed to the narrow confines of workplace disputes workers in the lowest tiers are transforming the power relations that sustain downgraded forms of work Her case studies of janitors and personal service workers in the United States and South Korea offer a surprising comparison between converging labor movements in two very different countries as they refashion their relation to historically disadvantaged sectors of the workforce and expand the moral and material boundaries of union membership in a globalizing world

Union Recognition Gregor Gall, 2006-01-16 Several thousand new trade union recognition agreements have been signed since 1997 representing a major development within industrial relations in Britain This has resulted from the interaction of union organizing efforts and the statutory union recognition provisions of the Employment Relations Act 1999 However for trade unions recognition alone is not enough a vital issue is whether having gained union recognition trade unions are now effectively delivering upon the promises and prospects of union recognition These essays examine the substantive outcomes of these new agreements in regard to union representation and collective bargaining In particular they explore the impact on terms and conditions of employment employers behaviour and strategy the nature of the union management bargaining relationship the building of workplace unionism While the collection focuses primarily on Britain the germane issues are also looked at in the context of Australia Canada and the U S A Conceptually and theoretically Union Recognition offers contributions which develop our understanding of the relationship between workplace and national unionisms and of mobilization theory

Uncertain Times E. Paul Durrenberger, 2017-08-15 In this first ever collection of labor anthropology from around the world the contributors to Uncertain Times assert that traditional labor unions have been co-opted by neoliberal policies of corporate capital and have become service organizations rather than drivers of social movements The current structure of labor unions facilitates corporations need for a stable labor force while reducing their power to prevent outsourcing subcontracting and other methods of undercutting worker security and union power Through case studies from Switzerland Israel Argentina Mexico the United States Greece Sweden Turkey Brazil and Spain the authors demonstrate that this process of neutering unions has been uneven across time and space They also show that the potential exists for renewed union power based on more vociferous and creative collective action These firsthand accounts from activist anthropologists in the trenches as union members and staff as well as academics analyzing policy law worker organizing and community impact illustrate the many approaches that workers around the world are taking to reclaim their rights in this ever shifting labor landscape Uncertain Times is the first book to use this crucial comparative ethnographic approach for understanding the new rules of the global labor struggle and the power workers have to change those rules The volume will be of great interest to students and scholars of anthropology sociology of work and labor studies labor union leadership and others interested in developing innovative methods for organizing working people fomenting class consciousness and expanding social movements Contributors Alpan Birelma Emma Braden Maria Eugenia de la O Christopher Kelley Staffan L. The Future of Unions and Worker Representation Anthony Forsyth, 2022-01-13 This book charts the path to revitalisation for trade unions in Australia the USA the UK and Italy It examines the examples of innovation and digital

campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism globalisation and hostility from employers and the state The study evaluates the responses of unions in each country to falling membership levels since the 1980s It considers the US organising model and its adoption in Australia and the UK comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers The increasing reliance of US unions on community alliances as seen in the Fight for 15 and similar campaigns is scrutinised along with new union prototypes like Hospo Voice in Australia the Independent Workers Union of Great Britain and SI Cobas in Italy The book includes an in depth analysis of union responses to the gig economy in the four countries and the emergence of self organised worker collectives to combat this exploitative business model The vital role played by unions in defending the interests of workers during the COVID 19 pandemic is also examined As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws This cross national study provides a rich basis for identifying the combination of reforms strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers

Between Cross and Class Lex Heerma van Voss, Patrick Pasture, Jan de Maeyer, 2005 In the late nineteenth century in a number of continental European countries Christian associations of workers arose Christian trade unions workers cooperatives political leagues workers youth movements and cultural associations sometimes separately for men and women In some countries they formed

a unified Christian labour movement which sometimes also belonged to a broader Christian subculture or pillar encompassing all social classes In traditional labour history Christian workers organizations were solely represented as dividing the working class and weakening the class struggle However from the 1980s onwards a considerable amount of studies have been devoted to Christian workers organizations that adopted a more nuanced approach This book takes stock of this new historiography To broaden the analysis each contribution compares the development in at least two countries thus generating new comparative insights This volume assesses the development of Christian workers organizations in Europe from a broad historical and comparative perspective The contributions focus on the collective identity of the Christian workers organization their denominational and working class allegiances and how these are expressed in ideology organization and practice Among the themes discussed are relations with churches and Christian Democracy secularization the development of the Welfare State industrial relations and the contribution to working class culture This volume is the result of a joint intellectual enterprise of the International Institute of Social History IISG in Amsterdam Netherlands and a group of scholars linked to the KADOC Documentation and Research Centre for Religion Culture and Society of the KU Leuven Catholic University Leuven Belgium

Appelbaum, 2000-06-28 In this study Edna Bonacich and Richard Appelbaum investigate the return of sweatshops to the apparel industry especially in Los Angeles The new sweatshops they say need to be understood in terms of the decline in the American welfare state and its strong unions and the rise in global and flexible production
