Ontologies for Agents: Theory and Experiences Valentina Tamma,Stephen Cranefield,Timothy W. Finin,Steven Willmott,2006-03-30 There is a growing interest in the use of ontologies for multi agent system applications On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable knowledge sharing and a growing number of applications have benefited from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle

ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on understanding the goals preferences and constraints posed by the user Autonomy is the ability to perform a task with little or no user intervention while proactiveness involves acting autonomously with no need for user prompting Communication but also autonomy and proactiveness depend on knowledge The ability to communicate depends on understanding the syntax terms and structure and the semantics of a language Ontologies provide the terms used to describe a domain and the semantics associated with them In addition ontologies are often complemented by some logical rules that constrain the meaning assigned to the terms These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and proactiveness are based

BiPolar NORMAL Matt Collinge, 2021-05-31 If there's a mental illness which has too often been stigmatised and misunderstood by the very people who should be most understanding about it well that's bipolar Dealing with bipolar isn't easy at all It's like going on a rollercoaster getting ready to experience in one's own skin both highs and lows along the way The real problem may be that one simply focuses on the wrong element Most people try to find the right treatment for bipolar rage mania or any event of this kind not acknowledging at all the role carers may be playing and what these events may have been caused by That's wrong as understanding the root of a problem may help immensely in finding a real solution This book is meant for carers friends and family members whose contribution in situations of this kind cannot be overstated It's true that there's no manual to be followed but this work may help you learn something about how to approach and take care of a person who is doing it tough A Melbourne boy through and through Matt Collinge is a proud resident of his adopted suburb Footscray It was there that he met his wife and discovered her vast reservoirs of patience For Matt was diagnosed with bipolar type I when he was 17 years old and this has seen the best and

worst of him Matt has been to Melbourne s most prestigious and therefore least useful universities and currently holds a Bachelor of Commerce Postgraduate Diploma in Political Studies a Graduate Diploma in Teaching and of course a Certificate IV in Mental Health Matt s passions include music movies and reading but in reality it is more bars pubs and French food with his Vietnamese wife Matt loves economics politics and sociology all with a pint or two and some Footscray grub
