Oral Cancer Diagnosis Management And Rehabilitation:

Oral Cancer John W. Werning, 2011-01-01 Oral Cancer Diagnosis Management and Rehabilitation provides readers with a systematic review of the diagnostic and treatment principles that maximize the outcomes of patients who have been diagnosed with oral cancer. Written by authorities in the fields of head and neck surgical oncology, radiation oncology, reconstructive surgery, dentistry, and oral and maxillofacial surgery, this textbook provides clinicians with a unified management philosophy that is firmly based upon the best available evidence in the peer-reviewed literature. In-depth clinical reviews of preferred treatment approaches and reconstructive techniques for each oral mucosal site facilitate the development of effective treatment strategies that are tailored to the location and extent of the lesion. The book describes the interrelationship between the site of oral cancer involvement and its impact on outcomes such as local/regional cancer control and quality of life following treatment. Features insightful reviews of controversial clinical issues such as the management of early mandibular invasion and the clinically negative neck. Step-by-step descriptions of surgical techniques which improve access to particular regions of the oral cavity permit the resection of tumors with minimal morbidity and result in optimal reconstructive outcomes. Exhaustive coverage of topics that have heretofore received limited attention in textbooks devoted to oral cancer, including the evaluation and management of oral premalignant lesions, osseointegrated implantation, and dental implant imaging and orofacial pain. Educational photographs and illustrations highlighting important teaching points and critical nuances in surgical technique. Ideal for reading cover to cover, this book is both an indispensable reference for experienced clinicians and an essential educational tool for residents and other members of the multidisciplinary oral cancer team.

Oral Cancer Carole Fakhry, Karen T. Pitman, Ana P. Kiess, David W. Eisele, 2020-06-03 A state-of-the-art guide on oral cancer management from distinguished experts. Oral Cancer Evaluation, Therapy, and Rehabilitation, edited by prominent Johns Hopkins clinicians and educators Carole Fakhry, Karen Pitman, Ana Kiess, and David Eisele, provides a comprehensive state-of-the-art review on the diagnosis and management of oral cancer. This unique resource fills a void in the literature by exploring surgical and reconstructive issues specific to each subsite of the oral cavity. Important pre- and post-treatment evaluations by dental, speech, language, pathology, and the oncologic care team are reviewed. The comprehensive book is divided into 10 sections, each focused on different facets of the patient's trajectory. The text starts with epidemiology of oral cavity cancer and discussion of patient populations at increased risk of oral cavity cancer. The book details pre-cancers, multidisciplinary diagnostic evaluations, treatment, post-treatment, recurrent, and metastatic oral cancer, and palliative care, concluding with future directions such as chemoprevention. A full spectrum of oral neoplasms are covered in depth, including different types of squamous cell cancer, primary malignancies of the mandible and sublingual, and minor salivary gland malignancies.

Key Features: All oral cavity subsites are approached from both an ablative and reconstructive

standpoint with dedicated chapters focused on specific oral cancer reconstructive techniques Discussion of oncologic considerations encompassing radiation and medical oncology including definitive radiation therapy brachytherapy adjuvant radiation therapy and adjuvant chemotherapy novel therapeutics Clinical pearls cover complications of both surgery and radiation therapy as well as psychological and dental implications of therapy High quality illustrations photographs and videos further elucidate impacted anatomy and techniques Residents and clinicians in otolaryngology head and neck surgery oral and maxillofacial surgery head and neck reconstructive surgery medical oncology and radiation oncology will benefit from reading this excellent resource Dentists who wish to further their knowledge about oral cancers will also find it an invaluable reference
