Sharbrough, 2017-09-11 Effective leaders lead by communicating. It is through communication that leadership is enacted as leaders influence followers to behave in ways that achieve the leader's and the organization's goals. This book applies leadership theory and research to communication in ways that are easily understood and can be applied to any situation where individuals find themselves in a leadership position in an organization whether as a front line or top level leader. The book begins with a basic explanation of the leadership process and how leaders express their vision. It then looks at how leaders can create positive relationships with followers that pay off in effective performance. Next the book investigates how leaders motivate their followers by creating follower self efficacy, trust and valued rewards. Then the focus changes to the specific types of messages a leader can use to motivate followers. Leading is about change so the book next looks at ways effective leaders communicate in leading change in organizations and at how the changing workforce is effecting how effective leaders communicate with the new workforce. **Work, Working and Work Relationships in a Changing World** Clare Kelliher, Julia Richardson, 2018-12-17 This book is concerned with the rapid and varied changes in the nature of work and work relationships which have taken place in recent years. While technological innovation has been a key contributor to the nature and pace of change other social and market trends have also played a part such as increasing workforce diversity, enhanced competition and greater global integration. Responding to these trends alongside cost pressures and the need for continued responsiveness to the environment organizations have changed the way in which work is organized. There have also been shifts in product markets with growing demand for authenticity and refinement of the customer experience which has further implications for how work is organized and enacted. At the same time employees have sought changes in their work arrangements in order to help them achieve a more satisfactory relationship between their work and non work lives. Many have also taken increased responsibility for managing their own work opportunities moving away from dependency on a single employer. The implications of these significant and widespread changes are the central focus of this book and in particular the implications for workers, managers and organizations. It brings together contributions from an international team of renowned management scholars who explore the opportunities and challenges presented by technological and digital innovation, consumer social and organizational change. Drawing on empirical evidence from Europe, North America and Australia, **Work, Working and Work Relationships in a Changing World** considers new forms of service work, technologically enabled work and independent professionals to provide in depth insight into work experiences in the 21st Century.
