Recent Advances in Intelligent Image Search and Video Retrieval Chengjun Liu, 2017-04-18

This book initially reviews the major feature representation and extraction methods and effective learning and recognition approaches which have broad applications in the context of intelligent image search and video retrieval

It subsequently presents novel methods such as improved soft assignment coding Inheritable Color Space InCS and the Generalized InCS framework the sparse kernel manifold learner method the efficient Support Vector Machine eSVM and the Scale Invariant Feature Transform SIFT features in multiple color spaces

Lastly the book presents clothing analysis for subject identification and retrieval and performance evaluation methods of video analytics for traffic monitoring

Digital images and videos are proliferating at an amazing speed in the fields of science engineering and technology media and entertainment

With the huge accumulation of such data keyword searches and manual annotation schemes may no longer be able to meet the practical demand for retrieving relevant content from images and videos a challenge this book addresses
