H. Tong,2013-09-12 Focusing on geoscience this book applies a uniquely cross disciplinary perspective to its examination of the relationship between scientific research and teaching at universities Contributions show how the use of technology and innovative pedagogical design allows students at different stages of their university studies to develop skills and experience in geoscience research The book offers wide ranging insight from academics in geoscience science education and higher education policy and pedagogy as well as from students and industry experts The opening section sets the context with a chapter on teaching and research in the contemporary university by a world leading academic in higher education and an essay by the editor on the case of moving from research implicit to research enhanced teaching Part Two addresses the research teaching nexus in geoscience offering

chapters entitled The Challenge of Combining Research and Teaching A Young Geoscientist s Perspective Teaching on the High Seas How Field Research Enhances Teaching at All Levels Curricula and Departmental Strategies to Link Teaching and Geoscience Research and Geoscience Internships in the Oil and Gas Industry among others In Part Three the use of technology is discussed in chapters such as Using Interactive Virtual Field Guides and Linked Data in Geoscience Teaching and Learning and Towards Technology and Research enhanced Education TREE Electronic Feedback as a Teaching Tool in Geoscience The Program Design section includes chapters on Introducing University Students to Authentic Hands on Undergraduate Geoscience Research and the opportunity to link research and teaching in students final projects and more Geoscience Research and Education Teaching at Universities is a useful resource for understanding the research teaching nexus and how it has been implemented in different types of universities and in different countries Science academics seeking to integrate research into teaching will find the book highly relevant to their work The emphasis on using technology as a means to link research and teaching will be of great interest and practical benefit to learning technologists science educators and university policymakers Together with the companion volume Geoscience Research and Outreach Schools and Public Engagement this book showcases the key role that geoscience research plays in a wide spectrum of educational settings

A-Z Advancing Geography Dave Holmes,2000 **Learning to Teach Geography in the Secondary School** David Lambert,David Balderstone,2012-08-21 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps them acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and creative lessons This fully revised and updated second edition takes account of new legislation and important developments in geography education including literacy numeracy citizenship and GIS Brand new chapters in this edition provide essential guidance on fieldwork and using ICT in the context of geography teaching and learning Chapters on teaching strategies learning styles and assessment place the learner at the centre stage and direct advice and activities encourage successful practice Designed for use as a core textbook Learning to Teach Geography in the Secondary School is essential reading for all student teachers of geography who aspire to become effective reflective teachers Praise for the first edition of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work that is likely to become a standard reference for many beginning teachers on geography initial teacher training courses in England and Wales Educational Review **Teaching Tourism** Edelman, Johan,Joppe, Marion,Flaherty, Joan,2022-02-22

Tourism as an activity is increasingly being criticised for its exploitative and extractive industrial approaches to business Yet

it has the power to transform and to regenerate societies cultures and the environment The desire to explore the world around us is deeply embedded in many people s psyche but it comes at a cost to the environment and often to the residents of the visited communities Much of tourism education has been closely linked to preparing students for future professional practice but the challenges and opportunities linked to its consumption require that its future leaders must exhibit very different values and understandings to tackle ever more complex and wicked problems from which tourism cannot dissociate itself This compilation of values based learning experiences can be adapted to suit the needs and disposition of individual instructors and aims not only to engage students in the subject matter but also deepen their understanding of its complexity and interconnectivity and help them become global citizens that lead lives of consequence **Learning and Teaching with**

Maps Patrick Wiegand,2006-01-31 A comprehensive and authoritative account of how primary school children and teachers can use maps to enhance learning and deepen understanding of this essential skill It includes all aspects of map use such as reading and interpreting maps and using maps to find the way covering maps of all scales including globes and atlases The text is extensively illustrated with examples including maps made by children themselves using conventional materials as well as computer software A particular feature of the book is the integration of digital and conventional mapping and Internet and CD ROM cartography together with simple applications of Geographic Information Systems GIS appropriate to the needs of children right through primary and secondary education This book will be of great use to all primary teachers and subject teachers in secondary school as well as non specialist geography teachers and will enable children to use all types of maps in new compelling and thoughtful ways **Geography, Education and the Future** Graham Butt,2011-03-17 **Becoming**
