world financial crises and instability global warming degradation of the environment growing inequality this book asks the question what contribution does accountancy make to the solution of these problems The book argues that the accountancy profession does not serve the public interest notwithstanding its claim to this effect The Social Function of Accounts argues that the moral responsibility of the accountant is analysed with reference to the principal theories of ethics continuing that the individual accountant has a moral responsibility to consider the impact of his actions on other people and on society as a whole This responsibility is then analysed in a series of chapters dealing with four specific aspects of the matter Distributive Justice Sustainability Financial reporting the Accountancy Profession Concluding with a call for the accountancy profession to adopt a new ethic of service to the public The Social Function of Accounts redraws the boundaries of current accounting literature and will be vital reading for academics researchers and policy makers in accounting and related disciplines
