Color woodcut printmaking was not new to Britain America or Japan in the late eighteenth century Yet after Japan was opened to the West in 1854 and deeper cultural exchange began Japanese prints captured the European and American imagination The fresh colors simplicity of materials and departure from traditional compositions entranced western artists and the public alike Likewise Japanese audiences and artists were intrigued by the styles and techniques of western art which was broadly available in Japan by the end of the nineteenth century Artists there created images of the strange foreigners and imagined what American cities looked like By the beginning of the twentieth century artists were not content to merely imagine what the other side of the world looked like As prints traveled around the globe for study so did artists and with them spread the tricks and techniques of color woodblock printmaking as well as appreciation for the prints Woodblock printmakers in the West started to investigate Japanese processes and Japanese publishers began to seriously seek out the print market outside of Japan Important themes began to emerge scenes of nature and old fashioned architecture outnumbered modern city views and images of animals were nearly as popular as those of human figures Imagery was often idyllic and beautiful attractive to an international audience Twentieth century art however moves at a furious pace and the ferment of the international woodcut style quickly ran its course Artists appropriated what they needed from the color woodcut then developed techniques subjects and styles in their own ways An ever expanding range of prints became indebted to the artists of the previous generation who had reinvigorated woodblock printmaking styles and practices around the world This full color catalogue includes many prints from this colorful exhibition and shows how the progression of styles became more similar as international artists learned from and competed with each other then stylistically diverged as artists of each country took what they learned in new directions The three essays each focus on the influences and contributions made to the international style by three countries Japan Britain and America **Modern Woodman Magazine** Frank O. Van Galder, 1929 Modern Girls on the Go Alisa Freedman, Laura Miller, Christine R. Yano, 2013-04-17 This spirited and

engaging multidisciplinary volume pins its focus on the lived experiences and cultural depictions of women's mobility and labor in Japan. The theme of modern girls continues to offer a captivating window into the changes that women's roles have undergone during the course of the last century. Here we encounter Japanese women inhabiting the most modern of spaces in newly created professions moving upward and outward claiming the public life as their own: shop girls, elevator girls, dance hall dancers, tour bus guides, airline stewardesses, international beauty queens, overseas teachers, corporate soccer players, and even female members of the Self Defense Forces. Directly linking gender, mobility, and labor in 20th and 21st century Japan, this collection brings to life the ways in which these modern girls historically and contemporaneously have influenced social roles, patterns of daily life, and Japan's global image. It is an ideal guidebook for students, scholars, and general readers alike.

Irma Stern and the Racial Paradox of South African Modern Art LaNitra M. Berger, 2020-11-12

South African artist Irma Stern 1894-1966 is one of the nation's most enigmatic modern figures. Stern held conservative political positions on race even as her subjects openly challenged racism and later the apartheid regime. Using paintings, archival research, and new interviews, this book explores how Stern became South Africa's most prolific painter of Black Jewish and Colored mixed-race life while maintaining controversial positions on race. Through her art, Stern played a crucial role in both the development of modernism in South Africa and in defining modernism as a global movement. Spanning the Boer War to Nazi Germany to apartheid South Africa and into the contemporary Rhodes Must Fall movement, Irma Stern's work documents important twentieth-century cultural and political moments. More than fifty years after her death, Stern's legacy challenges assumptions about race, gender roles, and religious identity and how they are represented in art history.

*The Poster* Ruth E. Iskin, 2014-10-07

The Poster: Art, Advertising, Design, and Collecting 1860s-1900s is a cultural history that situates the poster at the crossroads of art, design, advertising, and collecting. Though international in scope, the book focuses especially on France and England. Ruth E. Iskin argues that the avant-garde poster and the original art print played an important role in the development of a modernist language of art in the 1890s as well as in the adaptation of art to an era of mass media. She moreover contends that this new form of visual communication fundamentally redefined relations between word and image: poster designers embedded words within the graphic rather than using images to illustrate a text. Posters had to function as effective advertising in the hectic environment of the urban street. Even though initially commissioned as advertisements, they were soon coveted by collectors. Iskin introduces readers to the late nineteenth-century iconophile, a new type of collector-curator-archivist who discovered in poster collecting an ephemeral archaeology of modernity. Bridging the separation between the fields of art, design, advertising, and collecting, Iskin's insightful study proposes that the poster played a constitutive role in the modern culture of spectacle. This stunningly illustrated book will appeal to art historians and students of visual culture as well as social and cultural history, media design, and advertising.
