Modes Of Therapeutic Action:

Modes of Therapeutic Action Martha Stark, 2000-10 How do we position ourselves in relation to our patients Do we participate as neutral object as empathetic self object or as authentic subject Do we strive to enhance the patient's knowledge to provide a corrective experience or to work at the intimate edge

Modes of Therapeutic Action Martha Stark, 1999-04 How do we position ourselves moment by moment in relation to our patients and how do these positions inform both what we come to know about our patients and how we intervene Do we participate as neutral object as empathetic self object or as authentic subject Do we strive to enhance the patient's knowledge to provide a corrective experience or to work at the intimate edge In an effort to answer these and other clinically relevant questions about the process of psychotherapeutic change Martha Stark has developed a comprehensive theory of therapeutic action that integrates the interpretive perspective of classical psychoanalysis Model 1 the corrective provision perspective of self psychology and those object relations theories emphasizing the internal absence of good Model 2 and the relational perspective of contemporary psychoanalysis and those object relations theories emphasizing the internal presence of bad Model 3 Model 1 is about knowledge and insight It is a one person psychology because its focus is on the patient and the internal workings of her mind Model 2 is about corrective experience It is a one and a half person psychology because its emphasis is not so much on the relationship per se but on the filling in of the patient's deficits by way of the therapist's corrective provision what ultimately matters is not who the therapist is but rather what she can offer Model 3 is about relationship the real relationship It is a two person psychology because its focus is on patients and therapists who relate to each other as real people it is about mutuality reciprocity and intersubjectivity Whereas Model 2 is about give and involves the therapist's bringing the best of who she is into the room Model 3 is about give and take and involves the therapist's bringing all of who she is into the room As Dr Stark repeatedly demonstrates in numerous clinical vignettes the three modes of therapeutic action knowledge experience and relationship Dare not mutually exclusive but mutually enhancing If as therapists we can tolerate the necessary uncertainty that comes with the recognition that there is an infinite variety of possibilities for change then we will be able to enhance the therapeutic potential of each moment and optimize our effectiveness as clinicians

Treating traumatized patients takes its toll on the treating clinician giving rise over time to what Richard B Gartner terms countertrauma in the psychoanalyst or therapist Paradoxically a clinician may also be imbued with a sense of optimism or counterresilience after learning how often the human spirit can triumph over heartbreakingly tragic experiences Trauma and Countertrauma Resilience and Counterresilience brings together a distinguished group of seasoned clinicians both trauma specialists and psychoanalysts Their personal reflections show what clinicians all too rarely dare to reveal their personal traumatic material They then discuss how they develop models for acknowledging articulating and synthesizing the countertrauma that arises from long term exposure to patients often harrowing trauma Writing openly using viscerally affecting language the contributors to this exceptional collection share subjective and sometimes intimate material shedding light on the inner lives of people who work to heal the wounds of psychic trauma By the same token many of these clinicians describe how working intimately with traumatized individuals can affect the listener positively recounting how patients resilience evokes counterresilience in the therapist allowing the clinician to benefit from ongoing contact with patients who deal bravely with horrific adversity Paradoxically a clinician may be imbued with a sense of optimism after learning how often the human spirit can triumph over heartbreakingly tragic experiences Trauma and Countertrauma Resilience and

Psychoanalytic Method in Motion Richard Tuch, 2017-10-30 Psychoanalytic Method in Motion identifies and examines varied controversies about how psychoanalysts believe treatment should best be conducted Irrespective of their particular school of thought every analyst builds up a repertoire of his favored ways of working which some analysts come to see as the most efficacious approach to treatment available While such differences of opinion are unsettling and may even threaten to tear the field asunder this book sees these differences as benefitting psychoanalysis by improving the ways in which psychoanalysts and psychoanalytic psychotherapists practice In this book Richard Tuch covers the waterfront by examining controversies that further the field by raising questions that help evolve the treatment challenging every analyst to re think what they are doing in the consulting room and why Some of the chief controversies explored include the enactment debate unparalleled tool or regrettable error whether analysts can truly be objective whatever that means the advantages and disadvantages arising from the analyst's use of authority the ways in which theory influences the analyst's search for data blinding him to evidence he implicitly discards as irrelevant whether any given treatment approach is more efficacious than others as some analysts claim the legitimacy of psychoanalysis itself whether it can truly be considered scientific whether certain methods of supervision are more effective than others whether free association can be considered therapeutic in and of itself the extent to which an analyst preferred clinical theory is a product of his personality Drawing on ideas from a range of different analytic perspectives this book is an essential and accessibly written guide to working towards best practice in the analytic setting Psychoanalytic Method in Motion will appeal greatly to both students and practitioners of psychoanalysis and psychoanalytic psychotherapy
