The Ontology, Psychology and Axiology of Habits (Habitus) in Medieval Philosophy Nicolas Faucher, Magali Roques, 2019-01-12 This book features 20 essays that explore how Latin medieval philosophers and theologians from Anselm to Buridan conceived of habitus as well as detailed studies of the use of the concept by Augustine and of the reception of the medieval doctrines of habitus in Suarez and Descartes Habitus are defined as stable dispositions to act or think in a certain way This definition was passed down to the medieval thinkers from Aristotle and to a lesser extent Augustine and played a

key role in many of the philosophical and theological developments of the time Written by leading experts in medieval and modern philosophy the book offers a historical overview that examines the topic in light of recent advances in medieval cognitive psychology and medieval moral theory Coverage includes such topics as the metaphysics of the soul the definition of virtue and vice and the epistemology of self knowledge The book also contains an introduction that is the first attempt at a comprehensive survey of the nature and function of habitus in medieval thought The material will appeal to a wide audience of historians of philosophy and contemporary philosophers It is relevant as much to the historian of ancient philosophy who wants to track the historical reception of Aristotelian ideas as it is to historians of modern philosophy who would like to study the progressive disappearance of the term habitus in the early modern period and the concepts that were substituted for it In addition the volume will also be of interest to contemporary philosophers open to historical perspectives in order to renew current trends in cognitive psychology virtue epistemology and virtue ethics

How the University Works Marc Bousquet,2008 Uncovers the labor exploitation occurring in universities across the country As much as we think we know about the modern university very little has been said about what it s like to work there Instead of the high wage high profit world of knowledge work most campus employees including the vast majority of faculty really work in the low wage low profit sphere of the service economy Tenure track positions are at an all time low with adjuncts and graduate students teaching the majority of courses This super exploited corps of disposable workers commonly earn fewer than 16 000 annually without benefits teaching as many as eight classes per year Even undergraduates are being exploited as a low cost disposable workforce Marc Bousquet a major figure in the academic labor movement exposes the seamy underbelly of higher education a world where faculty graduate students and undergraduates work long hours for fast food wages Assessing the costs of higher education s corporatization on faculty and students at every level How the University Works is urgent reading for anyone interested in the fate of the university
