it can as long as the world gets behind a new form and concept of capitalism Nkumunue is on a mission to fight poverty redistribute wealth and create better living conditions for vast numbers of people In this study he outlines how this new form of capitalism would affect the rich the middle class and the poor He explores critical issues such as the key role that demand plays in the economy the unforeseen ways in which liquidity affects us ways in which businesses can bolster markets through investment and ways for consumers can wield power in the marketplace A progressive form of capitalism could alleviate the world's suffering and narrow the wealth gap by stimulating investment and therefore job growth It has the potential to change the economic classes of the world decrease poverty and end the global economic crisis Monetary Theory and Practice John Lloyd Hanson, 1956 **Greening China's Urban Governance** Jørgen Delman, Yuan Ren, Outi Luova, Mattias Burell, Oscar Almén, 2018-10-24 This volume examines how urban stakeholders in China particularly city governments and social actors tackle China's urban environmental crisis The volume's case studies speak to important interdisciplinary themes such as new tools and instruments of urban green governance climate change and urban carbon consumption green justice digital governance public participation social media social movements and popular protest It lays out a unique theoretical framework for examining and discussing urban green governance The case studies are based on extensive fieldwork that examines governance failures challenges and innovations from across China including the largest cities They show that numerous policies experiments and reforms have been put in place in China mostly on a pragmatic basis but also as a result of both strategic policy design civil participation and protest The book highlights how China's urban governments bring together diverse programmatic building blocks and instruments from China and elsewhere Written by experts and researchers from different disciplines at leading universities in China and the Nordic countries in Europe this volume will be of interest to researchers and students who are interested in Chinese politics especially urban politics governance issues and social movements Both students and teachers will find the theoretical perspectives and case studies useful in their coursework The unique green governance perspective makes this a work that is empirically and theoretically interesting for those working with urban political and environmental studies and urbanization worldwide *A Socio-Legal Theory of Money for the Digital Commercial Society* Israel Cedillo Lazcano, 2024-02-22 This book poses the question do we need a new body of regulations and the constitution of new regulatory agents to face the evolution of money in the Fourth Industrial Revolution After the Global Financial Crisis and the subsequent introduction of Distributed Ledger Technologies in monetary matters multiple opinions claim that we are in the middle of a financial revolution that will eliminate the need for central banks and other financial institutions to form bonds of trust on our behalf In contrast to these arguments this book argues that we are not witnessing a revolutionary expression but an evolutionary one that we can trace back to the very origin of money Accordingly the book provides academics regulators and policy makers with a multidisciplinary analysis that includes elements such as the relevance of intellectual property rights which are disregarded in the legal analysis of money

Furthermore the book proposes the idea that traditional analyses on the exercise of the *lex monetae* ignore the role of inside monies and technological infrastructures developed and supported by the private sector as exemplified in the evolution of the cryptoassets market and in cases such as *Banco de Portugal v Waterlow Sons* The book puts forward a proposal for the design and regulation of new payment systems and invites the reader to look beyond the dissemination of individual Distributed Ledger Technologies such as Bitcoin

Between Payments and Credit George Pantelopoulos, 2025-06-22 In unpacking credit relationships and payments over the past 1000 years in addition to how technological innovations are shifting the credit relationships payments landscape from barter commodity money single layered to dual layered financial money systems and from CBDC to stablecoins this book systematically explores the various techniques that have been introduced in an attempt to improve the organisation efficiency and stability of the IOU economy as a way to mitigate or prevent the universal challenge of the IOU economy from binding In doing so the book first unpacks how credit relationships payments and economic life have developed throughout history and sheds light on how the adoption of various techniques have led to greater efficiencies in payments across time In addition the book also explores how technological innovations are shifting the credit relationships payments landscape Subsequently the book demonstrates how the adoption of five major techniques have to a large extent mitigated but not eliminated the threat of the universal challenge of the IOU economy from arising With this the book also envisages that the adoption of systems of financial accounts provides a didactic framework for those who are interested in studying topics in credit relationships and payments at an intermediate advanced level e g masters level university students academics etc
