## **Money Talks When Say Yes:**

*If Money Talks, What Does it Say?* Iain McMenamin, 2013-01-31 Why do businesses contribute to political parties Is money a universal language Do business contributions to political parties convey different messages in different countries This book answers these questions based on intensive case studies of Australia Canada and Germany as well as data from other countries Business money does talk politics In liberal Australia and Canada the competitive short term focus of firms generated substantial demand for private goods that could help firms develop an advantage over their rivals Thus business financing of parties conveyed a pragmatic message in exchange for small but certain financial benefits contributing businesses expect as a reciprocation to receive special consideration of their lobbying efforts Australia's left right party system created an awareness of policy risk which motivated ideological payments but there was no ideological bias in business financing of politics in centrist Canada In Germany's co-ordinated economy the most important policies for firms tend to be the public goods defined championed and delivered by their business associations In this context the pragmatic motivation for contributions to political parties is weak The combination of consensual political institutions and constrained parties means there is a very low risk of major policy change from election to election So there is also little interest in ideological financing of political parties If money talks what does it say places business financing of political parties in the context of debates about political corruption and offers advice on political reform Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www.ecprnet.eu](http://www.ecprnet.eu) The Comparative Politics series is edited by Professor David M Farrell School of Politics and International Relations University College Dublin Kenneth Carty Professor of Political Science University of British Columbia and Professor Dirk Berg Schlosser Institute of Political Science Philipps University Marburg

**How Money Talks** Lesley Murdin, 2018-03-05 Money speaks in everyday life and in literature of our greed and our generosity our pride and our humiliation and as it passes among us it shows our creativity and our ability to co-operate even while it can also lead us to fight to the death This book is for psychological therapists and for the general reader interested in human nature Money has mattered since the first human attempts to symbolise value and enable people to wait for the return on their own labours Since the financial crisis of 2008 its impact at a macro as well as a micro level is inescapable It has become a means of exchange much like language and has opened up social mobility to factors other than birth This book looks at the origin of money and its history but most of all what attitudes to money tell us about the way we connect to each other
