Networks In The Knowledge Economy:

Networks in the Knowledge Economy Rob Cross, Andrew Parker, Lisa Sasson, 2003-07-17 In today's de-layered knowledge intensive organizations most work of importance is heavily reliant on informal networks of employees within organizations. However most organizations do not know how to effectively analyze this informal structure in ways that can have a positive impact on organizational performance. *Networks in the Knowledge Economy* is a collection of readings on the application of social network analysis to managerial concerns. Social network analysis (SNA) a set of analytic tools that can be used to map networks of relationships allows one to conduct very powerful assessments of information sharing within a network with relatively little effort. This approach makes the invisible web of relationships between people visible helping managers make informed decisions for improving both their own and their group's performance. *Networks in the Knowledge Economy* is specifically concerned with networks inside of organizations and addresses three critical areas in the study of social networks: Social Networks as Important Individual and Organizational Assets, Social Network Implications for Knowledge Creation and Sharing, and Managerial Implications of Social Networks in Organizations. Professionals and students alike will find this book especially valuable as it provides readings on the application of social network analysis that reflect managerial concerns.

Networks, Knowledge Brokers, and the Public Policymaking Process Matthew S. Weber, Itzhak Yanovitzky, 2021-11-03 Social network analysis provides a meaningful lens for advancing a more nuanced

understanding of the communication networks and practices that bring together policy advocates and practitioners in their day to day efforts to broker evidence into policymaking processes This book advances knowledge brokerage scholarship and methodology as applied to policymaking contexts focusing on the ways in which knowledge and research are utilized and go on to influence policy and practice decisions across domains including communication health and education There is a growing recognition that knowledge brokers key intermediaries have an important role in calling attention to research evidence that can facilitate the successful implementation of evidence informed policies and practices The chapters in this volume focus explicitly on the history of knowledge brokerage research in these contexts and the frameworks and methodologies that bridge these disparate domains The contributors to this volume offer useful typologies of knowledge brokerage and explicate the range of causal mechanisms that enable knowledge brokers influence on policymaking The work included in this volume responds to this emerging interest by comparing assessing and delineating social network approaches to knowledge brokerage across domains The book is a useful resource for students and scholars of social network analysis and policymaking including in health communication public policy and education policy

Hub Cities in the Knowledge Economy Ben Derudder, Frank Witlox, 2016-05-13 The overarching research topic addressed in this book is the complex and multifaceted interaction between infrastructural accessibility connectivity of city regions on the one hand and knowledge generation in these city regions on the other hand To this end the book brings together chapters analysing how infrastructural accessibility is related to changing patterns of business location of knowledge intensive industries in city regions The chapters in this book specifically dwell on recent manifestations of and developments in the accessibility knowledge nexus with a particular metageographical focus on how this materializes in major city regions In the different chapters this shifting relation is broached from different perspectives seaports airports brainports at different scales ranging from global scale analyses to case studies and by adopting a variety of methodologies straddling the wide variety of methodological approaches currently adopted in human geography research Researchers contributing to this edited volume come from different scholarly backgrounds sociology human geography regional planning which allows for a varied treatise of this research topic

Knowledge Management and Innovation in Networks A. P. De Man, 2008-01-01 As an ever increasing amount of innovation takes place within networks companies are collaborating in developing and marketing new products services and practices This in turn requires knowledge to flow across company boundaries This book demonstrates how companies encourage this knowledge to flow in networks that can involve dozens of partners Substantiated by five in depth case studies of innovative networks the authors identify and analyse the solutions implemented by companies in order to meet the key knowledge management challenges they encounter Theoretical and management implications of the study are then defined Connecting the organization theory of networks with knowledge management theory this book will be of great interest to academics and students in business administration especially in the areas of organization strategy supply

chains and knowledge management *Business Networks and the Knowledge-driven Economy*, 2000 Knowledge and the Economy Peter Meusburger, Johannes Glückler, Martina Meskioui, 2013-05-23 The broad spectrum of topics surrounding what is termed the knowledge economy has attracted increasing attention from the scientific community in recent years The nature of knowledge intensive industries the spatiality of knowledge the role of proximity and distance in generating functional knowledge the transfer of knowledge via networks and the complex interplay between knowledge location and economic development are all live academic issues This book the fifth volume in Springer's Knowledge and Space series focuses on the last of these the multiple relationships between knowledge the economy and space It reflects the conceptual and methodological multidisciplinary emerging from this scholarship yet where there has up to now been a notable lack of communication between some of the contributing disciplines resulting in lexical and other confusions this volume brings concord and to foster interdisciplinarity These complications have been especially evident in our understanding of the spatiality of knowledge the part that spatial contexts play in knowledge creation and diffusion and the relevance of face to face contacts all of which are addressed in these pages The material here is grouped into four sections knowledge creation and economy knowledge and economic development knowledge and networks and knowledge and clusters It assembles new concepts and original empirical research from geography economics sociology international business relations and management The book addresses a varied audience interested in the historical and spatial foundations of the knowledge economy and is intended to bridge some of the gaps between the differing approaches to research on knowledge the economy and space *International Knowledge and Innovation Networks* Riccardo Cappellin, Rüdiger Wink, 2009-01-01 This work is a new valuable reference and tool for scholars students practitioners and policymakers interested in knowledge innovation regional growth and competitiveness Pier Paolo Patrucco Italian Journal of Regional Science This book is remarkable for several reasons It provides highly relevant empirical analysis into a fundamental but under researched area namely medium technology industries It proposes a new theoretical approach which builds on cognitive economics to explain how innovation in these industries is generated by interactive learning It develops important policy implications based on the concept of governance In doing so the authors of this book are able to successfully blend together micro to macro levels of analysis as well as regional and industrial economics with public policy The book should be carefully read by economists and social scientists policy makers and businessmen interested in innovation at the regional level Luigi Orsenigo University of Brescia and Bocconi University Italy This book explores the distinct nature of innovation in medium technology industrial sectors which are the key to European international competitiveness and examines the recent changes of networks within regional clusters The authors present best practice management and regional strategies and develop an original and coherent theoretical framework for the analysis of innovation processes called Territorial Knowledge Management They concentrate on the territorial dimension and the cognitive economics approach and go beyond the traditional focus on R D in

high tech sectors The pivotal role of intermediate institutions in the governance of modern co ordinated market economies is also highlighted Working towards defining new guidelines for creating networks of competence centers and removing barriers to the enlargement of knowledge and innovation networks in Europe this book will prove an enlightening read for those with an interest in postgraduate level management and innovation studies Management and policy making practitioners at both the regional and European level will also find much to interest them *Knowledge Economy, Development and the Future of Higher Education* Michael A. Peters, 2007-01-01 Prophetically almost thirty years ago Jean Fran ois Lyotard forecast the end of the modern research university based on Enlightenment principles He envisaged the emergence of technical institutes in the service of the information rich global multinationals This book reflects on the post war Western university and its discourses charting the crisis of the concept of the modern university First it examines the university within a global networked economy second it adopts poststructuralist perspectives in epistemology politics and ethics to appraise the role of the contemporary university third it introduces the notion of development in a critical fashion as a way of explaining its potentially new regional and international learning roles fourth it analyzes the rise of global science and the disciplines in the context of the global economy and finally it raises Lyotard s logic of performativity and the assessment of research quality within a neoliberal economy linking it firmly to the question of freedom and the republic of science
