The Normalization of the Radical Right Vicente Valentim, 2024-10-14
Radical right behavior is increasing across Western democracies often very quickly Previous research has shown however that political attitudes and preferences do not change as quickly Vicente Valentim argues that the role of social norms as drivers of political behavior is crucial for understanding these patterns Building on a norms based theory of political supply and demand he argues that growing radical right behavior is driven by individuals who already had radical right views but who did not act on those views because they thought that they were socially unacceptable If these voters do not express their preferences politicians can underestimate how much latent support there is for radical right policy This leaves the radical right with less skilled leaders who are unable to mobilize even radical right voters to support them However if politicians realize that there is more private support for radical right policy than is typically observable they have an incentive to run for politics with a radical right platform and to mobilize silent radical right views Their electoral success in turn leads to radical right individuals becoming more comfortable in displaying their views and impels more politicians to join the radical right The book's argument makes us rethink how political preferences translate into behavior shows how social norms affect the interaction of political supply and demand and highlights how a political culture that promotes inclusion can be eroded

Nationalism in Contemporary Europe Andrzej Marcin Suszycki, 2019-01-01
This book proposes a conceptualisation of nationalism with a multilevel operational character It offers three different perspectives on nationalism that consider both the discursive structure and the discursive agency of nationalism It also demonstrates a number of intra phenomenal and extra phenomenal constraints on nationalism This book underlines that nationalism in contemporary Europe should not be regarded in terms of methodological homogeneity and conceptual uniformity ideological rigidity or strategic consistency but rather as a contested segmented bounded and contextual phenomenon Andrzej Marcin Suszycki is adjunct professor Privatdozent at the Faculty of Economics and Social Sciences of the University of Potsdam

European Identity Kenneth Keulman, Agnes Katalin Koós, 2014-08-20

The further evolution of the European Union is mainly dependent on how its citizens relate to their fellow Europeans speaking a score of languages and belonging to a variety of cultures This book addresses the question of whether a new sense of collective self identification labeled European identity a special form of socio territorial identities is emerging Collective identities are works in progress they entail a salient strategic activist and future oriented dimension Divergent strategic goals of the constituent groups induce a perpetual contestation and negotiation of the group identity a process that in the case of the EU is intensified by the continuously changing boundaries and institutional structure of the super polity To confront these challenges this book has a double focus The first part weighs in on the feasibility of a

European identity in light of what the two main paradigms in the field primordialism and constructivism can predict The second part maps the social forces that are either favorable or inimical to the creation of a common social identity on the continent Both parts develop hypotheses about the processes we witness and test them with the available empirical data Part II distinguishes between passive and active supporters of the integration project besides the Euroskeptical segment of the public Provision of public goods by regional integration is believed to explain passive permissiveness while the main impetus for integration comes from those who may reap above average benefits from it This book contends that the groups of active supporters have historically been changing within the Union namely the political Left and Right are changing their roles in negotiating future developments Yet the evolution of the EU is also shaped by the solutions adopted to accommodate ethnic and cultural diversity The empirical tests involve opinion survey data taken from the Eurobarometer series World Value and European Social Surveys and the International Social Survey Programme expert ratings as well as party elite documents from the Manifesto Project Database Opening the Black Box of Cabinet-Level Politics Sarah Sinram, 2020-03-10 The book takes a look at social expenditure in affluent democracies in times of fiscal austerity The study analyzes expenditure changes in nine social policy areas between 1980-2010 from an intra-cabinet perspective by considering the partisan affiliation of responsible spending ministers and effects of budgeting reforms Thus the analysis contributes to the question of whether parties or institutions matter **Local Government Reforms in Countries in Transition** Frederick A. Lazin, Matt Evans, Vincent Hoffmann-Martinot, 2008-05-01 Local Government Reforms in Countries in Transition explores the impacts that the end of the Cold War and increased globalization have had on government around the world The decentralization of national governments has led to a greater role for local governments public administration and democratic representation are the new arena of local governments the world over Focusing not only on countries from the former Soviet Union but also on Israel China South Africa and Egypt the contributors to this volume present a truly global investigation of countries experiencing governmental transformation *Nested Games of External Democracy Promotion* Rainer Thiel, 2010-10-10 Nested Games of External Democracy Promotion develops a game-theoretic model that explains how an external actor influences the strategic interaction between an authoritarian regime and a democratic opposition In a multiple-arena approach the confrontation between regime and opposition on the domestic level is nested inside a game on the international level at which the regime is simultaneously entangled with a democracy promotion actor As a case study the book formally reconstructs how United States democracy assistance influenced the Polish liberalization process between 1980 and 1989 The process tracing of its causal mechanisms is extensive and builds on data previously not recorded With regard to Cold War history new light is brought into U.S. American policies and strategies behind the Iron Curtain *The Reluctant Economist* Richard A. Easterlin, 2004-04-26 Where is rapid economic growth taking us Why has its spread throughout the world been so limited What are the causes of the great twentieth-century advance in life expectancy Of the revolution in

childbearing that is bringing fertility worldwide to near replacement levels Have free markets been the source of human improvement Economics provides a start on these questions but only a start argues economist Richard A Easterlin To answer them calls for merging economics with concepts and data from other social sciences and with quantitative and qualitative history Easterlin demonstrates this approach in seeking answers to these and other questions about world or American experience in the last two centuries drawing on economics demography sociology history and psychology The opening chapter gives an autobiographical account of the evolution of this approach and why Easterlin is a reluctant economist

Reconceptualizing Development in the Global Information Age Manuel Castells, Pekka Himanen, 2014-08-29 The conditions in which development the process by which people individually and collectively enhance their capacities to improve their lives according to their values and interests operates have significantly changed in the global information age a period characterized by the technological revolution in information and communication the rise of the networking form of social organization and the global interdependence of economies and societies This volume aims to redefine the means and goals of development in this new context first by characterizing the specific mode of development informational development that the authors consider to be the driver of the creation of material wealth in the twenty first century secondly by reconceptualizing human development as the fulfilment of human wellbeing in the multidimensionality of the human experience ultimately affirming dignity as the supreme value of development thirdly by examining the relationship between informational development and human development After first setting out its analytical framework the book brings together a diverse set of empirically rich case studies to illustrate this investigation from across the globe Silicon Valley Costa Rica Chile South Africa Finland the European Union and China and concludes by attempting to reconceptualize development It raises important questions and provides observations including examining the concept of dignity as development to contribute to a policy debate that should provide specific answers linked to the conditions of each society and be enacted by democratic institutions in a concerted global effort to save humankind while there is still time *State and Environment*

Andreas Duit, 2014-05-30 This volume of comparative studies documents the continuing relevance of the state in environmental politics and policy The book also demonstrates the analytical power of the comparative approach to the study of environmental politics and policy offering cross national comparisons of environmental governance in both developed and developing countries Some chapters are based on qualitative studies from a small number of countries others offer statistical analyses of quantitative data from many more countries over a longer time period **Norm Antipreneurs and the Politics**

of Resistance to Global Normative Change Alan Bloomfield, Shirley V. Scott, 2016-10-04 Over recent decades International Relations scholars have investigated norm dynamics processes at some length with the norm entrepreneur concept having become a common reference point in the literature The focus on norm entrepreneurs has however resulted in a bias towards investigating the agents and processes of successful normative change This book challenges this inherent bias

by explicitly focusing on those who resist normative change norm antipreneurs The utility of the norm antipreneur concept is explored through a series of case studies encompassing a range of issue areas and contributed by a mix of well known and emergent scholars of norm dynamics In examining the complexity of norm resistance particular attention is paid to the nature and intent of the actors involved in norm contestation the sites and processes of resistance the strategies and tactics antipreneurs deploy to defend the values and interests they perceive to be threatened by the entrepreneurs and whether it is the entrepreneurs or the antipreneurs who enjoy greater inherent advantages This text will therefore be of interest to scholars and students of International Relations International Law Political Science Sociology and History **Young**

Citizens and New Media Peter Dahlgren, 2013-10-11 This book integrates four distinct topics young people citizenship new media and learning processes When taken together these four topics merge to define an arena of social and research attention that has become compelling in recent years The general international concern expressed of declining democratic engagement and the role of citizenship today becomes all the more acute when it turns to younger people At the same time there is growing attention being paid to the potential of new media especially internet and mobile telephony to play a role in facilitating newer forms of political participation It is clear that many of the present manifestations of new politics in the extra parliamentary domain not only make sophisticated use of such media but are indeed highly dependent on them With an impressive array of contributors this book will appeal to those interested in a number of spheres including media and cultural studies political science pedagogy and sociology **Our Social World: Condensed** Jeanne H.
