Rahemtulla,Rainer Rohdewohld,2022-10-12 Since its adoption in 2015 the 2030 Agenda on Sustainable Development has shaped not only international development cooperation but also the design of national trajectories for social and economic development In tandem with other global agendas adopted that year such as the Paris Agreement on Climate Change and UN Habitat s New Urban Agenda it remains the global and regional blueprint for sustainable development despite the COVID 19 pandemic The term localizing the Sustainable Development Goals SDGs has been used to capture the

importance of subnational governments for achieving national SDG agendas However there is little deeper analysis of the required nexus between fiscal political and legal arrangements for SNGs their involvement in national policy arenas which discuss and decide on national SDG strategies and the need for locally disaggregated data systems on the one hand and effective SDG localization strategies on the other hand It is this aspect which the present publication explores in greater detail by using country examples and conceptual analyses The text will be of interest to policymakers scholars students and practitioners in public policy and public administration decentralization and sustainable development with a focus on the Asia and Pacific region The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivative License CC BY NC ND 3 0 IGO *Graduate Studies* ,1993
