**Molecularizing Biology and Medicine** Soraya de Chadarevian, Harmke Kamminga, 2003-09-02 The contributors present a coherent set of case studies of practices technologies and strategies aimed at the isolation investigation manipulation production and uses of molecules including vitamins hormones blood products antibiotics and vaccines These case studies examine how processes of molecularization were set in motion in the inter war period how they were used as a resource in the biomedical mobilization of World War II and how new alliances and strategies created as part of the war effort played a central role in the reorganisation of biomedicine in the post war period

**Revisiting Normativity with Deleuze** Rosi Braidotti, Patricia Pisters, 2013-03-14 This volume assembles some of the most distinguished scholars in the field of Deleuze studies in order to provide both an accessible introduction to key concepts in Deleuze's thought and to test them in view of the issue of normativity This includes not only the law but also the question of norms and values in the broader ethical political and methodological sense The volume argues that Deleuze's philosophy rejects the unitary vision of the subject as a self regulating rationalist entity and replaces it with a process oriented relational vision of the subject But what can we do exactly with this alternative nomadic vision What modes of normativity are available outside the parameters of liberal self reflexive individualism on the one hand and the communitarian model on the other This interdisciplinary volume explores these issues in three directions that mirror Deleuze and Guattari's defense of the parallelism between philosophy science and the arts The volume therefore covers socio political and legal theory the epistemological critique of scientific discourse and the cultural artistic and aesthetic interventions emerging from Deleuze's philosophy

**Scrambling for Africa** Johanna Tayloe Crane, 2013-09-06 Countries in sub Saharan Africa were once dismissed by Western experts as being too poor and chaotic to benefit from the antiretroviral drugs that transformed the AIDS epidemic in the United States and Europe Today however the region is courted by some of the most prestigious research universities in the world as they search for resource poor hospitals in which to base their international HIV research and global health programs In Scrambling for Africa Johanna Tayloe Crane reveals how in the space of merely a decade Africa went from being a continent largely excluded from advancements in HIV medicine to an area of central concern and knowledge production within the increasingly popular field of global health science Drawing on research conducted in the U S and Uganda during the mid 2000s Crane provides a fascinating ethnographic account of the transnational flow of knowledge politics and research money as well as blood samples viruses and drugs She takes readers to underfunded Ugandan HIV clinics as well as to laboratories and conference rooms in wealthy American cities like San Francisco and Seattle where American and Ugandan experts struggle to forge shared knowledge about the AIDS epidemic The resulting uncomfortable mix of preventable suffering humanitarian sentiment and scientific ambition shows how global health research partnerships may paradoxically benefit from the very inequalities they aspire to redress A work of outstanding interdisciplinary scholarship Scrambling for Africa

**The Economics of Science: A Critical Realist Overview** David Tyfield, 2013-06-17 Dramatic and controversial changes in the funding of science over the past two decades towards its increasing commercialization have stimulated a huge literature trying to set out an economics of science Whether broadly in favour or against these changes the vast majority of these frameworks employ ahistorical analyses that cannot conceptualise let alone address the questions of why have these changes occurred and why now Nor therefore can they offer much insight into the crucial question of future trends Given the growing importance of science and innovation in an age of both a globalizing knowledge based economy itself in crisis and enormous challenges that demand scientific and technological responses these are significant gaps in our understanding of important contemporary social processes This book argues that the fundamental underlying problem in all cases is the ontological shallowness of these theories which can only be remedied by attention to ontological presuppositions Conversely a critical realist approach affords the integration of a realist political economy into the analysis of the economics of science that does afford explicit attention to these crucial questions a cultural political economy of research and innovation CPERI Accordingly the book sets out an introduction to the existing literature on the economics of science together with novel

discussion of the field from a critical realist perspective In arguing thus across levels of abstraction however the book also explores how concerted engagement with substantive social enquiry and theoretical debate develops and strengthens critical realism as a philosophical project rather than simply applying it Divided into two volumes in this first volume the book explores the top and tail of the argument regarding substantive and philosophical aspects Starting with substantive illustrations we explore the social challenges associated with the contemporary commercialization of science and the movement towards a knowledge based bio economy Having shown the explanatory benefits of assuming a realist political economy perspective the book then turns to the task of reconstructing and justifying that theoretical perspective True to the overall argument regarding attention to ontological presuppositions this starts with critical realism s critique of mainstream economics but also develops critical realism itself towards what may be called a transcendental constructivism

Voicing Girlhood in Popular Music Jacqueline Warwick, Allison Adrian, 2016-06-10 This interdisciplinary volume explores the girl s voice and the construction of girlhood in contemporary popular music visiting girls as musicians activists and performers through topics that range from female vocal development during adolescence to girls online media culture While girls voices are more prominent than ever in popular music culture the specific sonic character of the young female voice is routinely denied authority Decades old clich s of girls as frivolous silly and deserving of contempt prevail in mainstream popular image and sound Nevertheless girls find ways to raise their voices and make themselves heard This volume explores the contemporary girl s voice to illuminate the way ideals of girlhood are historically specific and the way adults frame and construct girlhood to both valorize and vilify girls and women Interrogating popular music childhood and gender it analyzes the history of the all girl band from the Runaways to the present the changing anatomy of a girl s voice throughout adolescence girl s participatory culture via youtube and rock camps and representations of the girl s voice in other media like audiobooks film and television Essays consider girl performers like Jackie Evancho and Lorde and all girl bands like Sleater Kinney The Slits and Warpaint as well as performative girlishness in the voices of female vocalists like Joni Mitchell Beyonc Miley Cyrus Taylor Swift Kathleen Hanna and Rebecca Black Participating in girl studies within and beyond the field of music this book unites scholarly perspectives from disciplines such as musicology ethnomusicology comparative literature women s and gender studies media studies and education to investigate the importance of girls voices in popular music and to help unravel the complexities bound up in music and girlhood in the contemporary contexts of North America and the United Kingdom
