## **Mompreneurs R Revised And Updated:**

**Women in Management** Alan T. Belasen, 2017-04-07 This book presents a realistic perspective on the paradoxes employees face when navigating work and personal responsibilities for career success. The author answers the critical question of how to achieve sustainable and rewarding work life integration from a perspective of both and rather than either or. While most books focus on a fragmented hyper effective view of women and leadership, this book advances the need for an integrated approach. Its Competing Values Framework acts as an organizing model that aligns personal competency with organizational capability, helping readers to identify important leadership roles and competencies, break societal barriers, and choose the right set of behaviors to fit their personal and professional goals. In chapter text boxes, provide personal insight from real employees, both entering and established in leadership positions, offering a varied perspective on the challenges and resolutions available to women in management. As men become more engaged with their families, they too will find this book a useful tool. Students in diversity, management, women and management, career development, leadership, and organizational behavior classes will benefit from this realistic and sustainable alternative to the have it all model. **Against Meritocracy**

Jo Littler, 2017-08-16 Meritocracy today involves the idea that whatever your social position at birth, society ought to offer enough opportunity and mobility for talent to combine with effort in order to rise to the top. This idea is one of the most prevalent social and cultural tropes of our time, as palpable in the speeches of politicians as in popular culture. In this book, Jo Littler argues that meritocracy is the key cultural means of legitimation for contemporary neoliberal culture, and that whilst it promises opportunity, it in fact creates new forms of social division. **Against Meritocracy** is split into two parts. Part I explores the genealogies of meritocracy within social theory, political discourse, and working cultures. It traces the dramatic U turn in meritocracy's meaning from socialist slur to a contemporary ideal of how a society should be organised. Part II uses a series of case studies to analyse the cultural pull of popular parables of progress, from reality TV to the super rich and celebrity CEOs, from social media controversies to the rise of the mumpreneur. Paying special attention to the role of gender, race, and class, this book provides new conceptualisations of the meaning of meritocracy in contemporary culture and society.
