Ford, 2021-05-20 This sweeping sociological analysis traces the

emergence of intellectual property as a new type of legal property **Markets in the Making** Michel Callon, 2021-12-07

Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of how everyday market activity gets produced If you re convinced you know what a market is think again In his long awaited study French sociologist and engineer Michel Callon takes us to the heart of markets to the unsung processes that allow innovations to become robust products and services Markets in the Making begins with the observation that stable commercial transactions are more enigmatic more elusive and more involved than previously described by economic theory Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of market activity that emphasizes what people designing products or launching startups soon discover the inherent difficulties of connecting individuals to things Callon s model is founded upon the notion of singularization the premise that goods and services must adapt and be adapted to the local milieu of every individual whose life they enter Person by person thing by thing Callon demonstrates that for ordinary economic transactions to emerge en masse singular connections must be made Pushing us to see markets as more than abstract interfaces where pools of anonymous buyers and sellers meet Callon draws our attention to the exhaustively creative practices that market professionals continuously devise to entangle people and things Markets in the Making exemplifies how prototypes fragile curiosities that have only just been imagined are gradually

honed into predictable objects and practices. Once these are active enough to create a desired effect yet passive enough to be transferred from one place to another without disruption, they will have successfully achieved the status of goods or services. The output of this more ample process of innovation as redefined by Callon is what we recognize as the market commercial activity at scale. The capstone of an influential research career at the forefront of science and technology studies, *Markets in the Making* coherently integrates the empirical perspective of product engineering with the values of the social sciences. After masterfully redescribing how markets are made, Callon culminates with a strong empirical argument for why markets can and should be harnessed to enact social change. His is a theory of markets that serves social critique. *The Land of Too Much* Monica Prasad, 2012-12-31 Monica Prasad's powerful demand side hypothesis addresses three questions: Why does the United States have more poverty than any other developed country? Why did it experience an attack on state intervention in the 1980s, known today as the neoliberal revolution? And why did it recently suffer the greatest economic meltdown in seventy-five years? Encyclopedia of Political Economy: L-Z Phillip Anthony O'Hara, 1999 Based on developments in political economy since the 1960s, this text is a compendium of the main principles, concepts, problems, institutions, schools, and policies associated with political economy. It is a comprehensive introduction to the field. **The Economy of Promises** Bruce G. Carruthers, 2024-08-20 A comprehensive and illuminating account of the history of credit in America and how it continues to divide the haves from the have-nots. *The Economy of Promises* is a far-reaching study of credit in nineteenth and twentieth-century America. Synthesizing and surveying economic and social history, Bruce Carruthers examines how issues of trust stitch together the modern U.S. economy. In the case of credit, that trust involves a commitment by debtors to repay money they have borrowed from lenders. Each promise poses a fundamental question: why does the lender trust the borrower? The book tracks the dramatic shift from personal qualitative judgments to the impersonal quantitative measurements of credit scores and ratings, which make lending on a much greater scale possible. It discusses how lending is shaped by the shadow of failure and the possibility that borrowers will break their promises and fail to repay their debts. It reveals how credit markets have been shaped by public policy, regulatory changes, and various political factors. And crucially, it explains how credit interacts with economic inequality, contributing to vast and enduring racial and gender differences, which are only exacerbated by the widespread use of credit scores and ratings for big data and algorithmic decision making. Bringing to life the complicated and abstract terrain of human interaction, we call the economy. *The Economy of Promises* is an important study of the tangle of indebtedness that for better or worse shapes and defines American lives. *Theoretical and Methodological Approaches to Social Sciences and Knowledge Management* Asunción López-Varela Azcárate, 2012-08-16 This is a unique and groundbreaking collection of questions and answers coming from higher education institutions on diverse fields and across a wide spectrum of countries and cultures. It creates routes for further innovation, collaboration, amidst the Sciences, both Natural and Social, the Humanities, and the private and public sectors of society. The chapters speak across

sociocultural concerns education welfare and artistic sectors under the common desire for direct responses in more effective ways by means of interaction across societal structures

**Rethinking the Theory of Money, Credit, and Macroeconomics** John Smithin, 2018-09-15 This book provides a comprehensive re working of the basic principles of monetary macroeconomics in an alternative monetary model AMM of economic growth the business cycle inflation and income distribution These principles differ considerably from those advanced in the standard macroeconomics literature and in textbooks However the latter have been demonstrably unsuccessful in the promotion of usable macroeconomic policy advice for the past several years actually decades A different approach is needed In particular the new approach takes seriously the vital role of credit creation and endogenous money in capitalism It does not imagine that all of the difficult questions of economic policy making may be resolved within a paradigm that conceptualizes economic activity as merely a question of barter exchange The result is a blueprint for a set of growth friendly macroeconomic policies which will promote full employment financial stability and higher real wages essentially for the benefit of the long suffering middle and working classes rather for the chamber of commerce and financial interests

Markets with Limits James Stacey Taylor, 2022-03-02 In Markets with Limits James Stacey Taylor argues that current debates over the moral limits of markets have derailed He argues that they focus on a market critical position that almost nobody holds That certain goods and services can be freely given away but should never be bought or sold And he argues that they focus on a type of argument for this position that there is reason to believe that nobody holds That trade in certain goods or services is wrongful solely because of what it would communicate Taylor puts the debates over the moral limits of markets back on track He develops a taxonomy of the positions that are actually held by critics of markets and clarifies the role played in current moral and political philosophy by arguments that justify or condemn

certain actions owing in part to what they communicate Taylor argues that the debates have derailed because they were conducted in accord with market rather than academic norms and that this demonstrates that market thinking should not govern academic research Markets with Limits concludes with suggestions as to how to encourage academics to conduct research in accord with academic norms and hence improve its quality Key features Provides original suggestions concerning how to improve the exegetical quality of academic research Systematically identifies the primary exegetical errors and the ways in which these errors have adversely influenced current debates that Jason Brennan and Peter Jaworski made in their influential book Markets Without Limits Argues that despite the current widespread view that semiotic objections to markets are widespread in the literature they are in actuality rare to nonexistent Offers an up to date taxonomy of the current arguments in the various debates over both the ontological and the moral limits of markets Provides an extensive overview of mistaken claims that have been made and propagated in various academic literatures
