*War 4.0* Deane-Peter Baker,Mark Hilborne,2025-05-01 This volume explores the impact of technology and new domains on future warfare It identifies several themes and highlights the increasing complexity of the security environment and the uncertainty of future war The sense of time and speed has been and is being compressed by developments in quantum technologies the cyber domain artificial intelligence the increased capabilities of sensors and data collection as well as new propulsion technologies such as hypersonic designs Concepts regarding the shape and extent of the battlefield are challenged by the notion of hybrid war and sub threshold tactics as well as new domains in which competition is increasing such as space Further challenging the shape of the battlefield is the increased development of remote and autonomous warfare Commercial developments will affect how military production is owned and managed and how military forces are composed Thus a confluence of new technologies exists combining to create the potential of fundamental transformation at many levels This wave of technological change has been called the Fourth Industrial Revolution 4IR characterised by an exponential rather than a linear rate of change generated by convergence and complementarity of emerging technology domains These may not affect the fundamental Clausewitzian nature of war but they will likely affect its character From a military perspective the key will be the impact on the speed of operations and on the shape of the operational domain the factors of time and space The combination of these shifts will increasingly affect the perception of states and the degree of certainty in approaching and engaging in conflict

**God, Jesus, and Other Foolishness** Jeffrey A. Kramer,2022-09-13 In our post Christian society many skeptics atheists and agnostics assume that the Christian faith involves belief in spite of a lack of evidence and that Christianity encourages its adherents to be satisfied with not understanding the world This is untrue Christianity has a legacy of thought and logic and a convincing case can be made that modern science and Western culture could only have sprung from the Judeo Christian worldview Although questions of origins purpose and meaning are not easily proved true in a scientific or empirical sense things can be true without empirical proof It does not follow that religion is untrue or that religious belief is for the credulous and the gullible Many of the presuppositions underlying any worldview cannot be proven empirically and acceptance of many of the truth claims of atheism and postmodernism requires just as much faith as acceptance of the fundamentals of Christianity This book is an attempt to demonstrate that biblical Christianity is true in the sense that it is a logical interpretation of reality and our lived experience and that the implications of Christian faith make more rational sense than a rejection of that faith

Rebel Giants David R. Contosta,2009-09-25 February 12 2009 will mark the 200th anniversary of the birth of two of the most

extraordinary and influential men in recent history Abraham Lincoln and Charles Darwin Contosta studies the similarities as well as the differences of these two giants of history **Charles Fort** Jim Steinmeyer,2008-05-01 The seminal biography of the twentieth century s premier chronicler of the paranormal Charles Fort a man whose very name gave rise to an adjective fortetean to describe the unexplained By the early 1920s Americans were discovering that the world was a strange place Charles Fort could demonstrate that it was even stranger than anyone suspected Frogs fell from the sky Blood rained from the heavens Mysterious airships visited the Earth Dogs talked People disappeared Fort asked why but even more vexing he also asked why we weren t paying attention Here is the first fully rendered literary biography of the man who more than any other figure would define our idea of the anomalous and paranormal In Charles Fort The Man Who Invented the Supernatural the acclaimed historian of stage magic Jim Steinmeyer goes deeply into the life of Charles Fort as he saw himself first and foremost a writer At the same time Steinmeyer tells the story of an era in which the certainties of religion and science were being turned on their heads And of how Fort significantly was the first man who challenged those orthodoxies not on the grounds of some counter fundamentalism of his own but simply for the plainest of reasons they didn t work In so doing Fort gave voice to a generation of doubters who would neither accept the straight story of scholastic science nor credulously embrace fantastical visions Instead Charles Fort demanded of his readers and admirers the most radical of human acts

Thinking **Moral Vision** Marvin Olasky,2024-02-13 What makes a leader truly great Is it simply a matter of management style and personality Or is it character that matters most Moral Visions takes an insightful look into America s leaders of the past to answer these questions and demonstrates that values and moral convictions are critical to the strength of a nation Supposedly we learn about the candidates for the highest office through a series of tests called debates which are instead an exchange of soundbites We can t know whether an aspirant to the presidency has the ability to ask good questions or only a suave or belligerent ability to answer them Moral Vision is a human interest introduction to American history through studies of nineteen leaders presidents almost presidents a tycoon a crusading journalist and even a leading 19th century abortionist Its lessons can help voters sort through the candidates in 2024 and beyond by measuring them against previous leaders none of whom was faultless It shows how the deepest views often grow out of religious belief and influence political goals racial prejudices sexual activities uses of power and senses of service In his 1789 inaugural address George Washington pledged that the foundation for national policy will be laid in the sure and immutable principles of private morality Marvin Olasky shows how 19th century leaders like Thomas Jefferson Andrew Jackson and Grover Cleveland partly upheld and partly ignored that promise and 20th century leaders like Woodrow Wilson John F Kennedy and Bill Clinton tried to compartmentalize the private and the public An extensively updated version of The American Leadership Tradition Moral Vision is for anyone tired of today s textbook tendencies to submerge the role of individuals as big economic and demographic waves roll in History is more than statistics economics and group identities Human beings are more than paper

boats riding the rainfall into gutters      *Darwin Day in America* John G. West, 2014-04-22 At the dawn of the last century leading scientists and politicians giddily predicted that science especially Darwinian biology would supply solutions to all the intractable problems of American society from crime to poverty to sexual maladjustment Instead politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines In criminal justice these experts denied the existence of free will and proposed replacing punishment with invasive cures such as the lobotomy In welfare they proposed eliminating the poor by sterilizing those deemed biologically unfit In business they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior In sex education they advocated creating a new sexual morality based on normal mammalian behavior without regard to longstanding ethical and religious imperatives Based on extensive research with primary sources and archival materials John G West s captivating *Darwin Day in America* tells the story of how American public policy has been corrupted by scientific ideology Marshaling fascinating anecdotes and damning quotations West s narrative explores the far reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong West concludes with a powerful plea for the restoration of democratic accountability in an age of experts

**Evolution** Donald R. Prothero, 2017-08-22 Donald R Prothero s *Evolution* is an entertaining and rigorous history of the transitional forms and series found in the fossil record Its engaging narrative of scientific discovery and well grounded analysis has led to the book s widespread adoption in courses that teach the nature and value of fossil evidence for evolution *Evolution* tackles systematics and cladistics rock dating neo Darwinism and macroevolution It includes extensive coverage of the primordial soup invertebrate transitions the development of the backbone the reign of the dinosaurs and the transformation from early hominid to modern human The book also details the many alleged missing links in the fossil record including some of the most recent discoveries that flesh out the fossil timeline and the evolutionary process In this second edition Prothero describes new transitional fossils from various periods vividly depicting such bizarre creatures as the *Odontochelys* or the turtle on the half shell fossil snakes with legs and the *Frogamander* a new example of amphibian transition Prothero s discussion of intelligent design arguments includes more historical examples and careful examination of the experiments and observations that are exploited by creationists seeking to undermine sound science education With new perspectives Prothero reframes creationism as a case study in denialism and pseudoscience rather than a field with its own intellectual dynamism The first edition was hailed as an exemplary exploration of the fossil evidence for evolution and this second edition will be welcome in the libraries of scholars teachers and general readers who stand up for sound science in this post truth era

*The Politics of Disaster* Marvin Olasky, 2006-07-29 Why was the government not capable of responding to human need in the aftermath of Hurricane Katrina How will the Katrina failure impact the next

presidential election And just what should we expect and not expect from the government in times of crisis Big government didn't work says veteran journalist and political analyst Marvin Olasky And it is clear that a new paradigm for responding to national crisis has emerged Private and faith based organizations have stepped in and politics will never be the same
