The Global City 2.0 Kristin Ljungkvist, 2015-08-27 Global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics So far surprisingly few studies have analyzed the role of the Global City beyond its already well explicated role in the globalized economy How is it that local governments of Global Cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments What does it mean to be and to govern the contemporary Global City In this book Kristin Ljungkvist claims that we can better understand why local governments find it to be in their Global City's interest to claim international political authority by exploring how the city's role in the globalized world is constructed and narrated locally A core claim is that Global City hood as a specific type of collective identity can play a constitutive part in such interest formation Combining insights from International Relations and Urban Studies scholarship and with the help of a case study on New York City Ljungkvist develops a new analytical framework for studying the Global City as an international political actor The Global City 2.0 shows that even as the Global City engages in various global issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city's economic

growth The quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary Global City However there seems to be a remarkable persistency and attraction in economic ideas and an economic conception of the Global City The Routledge Handbook of Comparative Global Urban Studies Patrick Le Galès, Jennifer Robinson, 2023-09-18 The Routledge Handbook of Comparative Global Urban Studies is a timely intervention into the field of global urban studies coming as comparison is being more widely used as a method for global urban studies and as a number of methodological experiments and comparative research projects are being brought to fruition It consolidates and takes forward an emerging field within urban studies and makes a positive and constructive intervention into a lively arena of current debate in urban theory Comparative urbanism injects a welcome sense of methodological rigor and a commitment to careful evaluation of claims across different contexts which will enhance current debates in the field Drawing together more than 50 international scholars and practitioners this book offers an overview of key ideas and practices in the field and extends current thinking and practice The book is primarily intended for scholars and graduate students for whom it will provide an invaluable and up to date guide to current thinking across the range of disciplines which converge in the study of urbanism including geography sociology political studies planning and urban studies Handbook of Neoliberalism Simon Springer, Kean Birch, Julie MacLeavy, 2016-07-07 Neoliberalism is easily one of the most powerful discourses to emerge within the social sciences in the last two decades and the number of scholars who write about this dynamic and unfolding process of socio spatial transformation is astonishing Even more surprising though is that there has until now not been an attempt to provide a wide ranging volume that engages with the multiple registers in which neoliberalism has evolved The Routledge Handbook of Neoliberalism seeks to offer a comprehensive overview of the phenomenon of neoliberalism by examining the range of ways that it has been theorized promoted critiqued and put into practice in a variety of geographical locations and institutional frameworks With contributions from over 50 leading authors working at institutions around the world the volume's seven sections will offer a systematic overview of neoliberalism's origins political implications social tensions spaces natures and environments and aftermaths in addressing ongoing and emerging debates The volume aims to provide the first comprehensive overview of the field and to advance the established and emergent debates in a field that has grown exponentially over the past two decades coinciding with the meteoric rise of neoliberalism as a hegemonic ideology state form policy and program and governmentality It includes a substantive introductory chapter and will serve as an invaluable resource for undergraduates graduate students and professional scholars alike Epidemics in Modern Asia Robert Shannan Peckham, 2016-04-28 The first history of epidemics in modern Asia Robert Peckham considers the varieties of responses that epidemics have elicited from India to China and the Russian Far East and examines the processes that have helped to produce and diffuse disease across the region **Quarantine** Alison Bashford, 2016-07-29 Over five centuries a global archipelago of quarantine stations came to connect the world's

oceans from the Mediterranean to the South Pacific from Atlantic coasts to the Red Sea In the process great new carceral structures materialised many surviving into the present as magnificent ruins or as 5 star hotels with a dark tourism edge This book offers new histories and geographies of quarantine islands and isolation hospitals across the world bringing their local and global pasts and present into view An international cast of leading experts examine the enduring historical problems of migration and mobility segregation prevention and protection by states with different interests in freedoms health and commerce With case studies from as far afield as the Red Sea Hong Kong and New Zealand and from the early modern period forward this book provides an invaluable insight into the history of quarantine
