Green, 2016-05-05 Ghost busting is never simple just ask the Ghost Finders of New York Times bestselling author Simon R. Green's Carnacki Institute In a quiet London suburb four university students are holding a séance in a house everyone knows is haunted and of course it goes terribly wrong Whatever or whoever they managed to summon has left them nothing but empty shells Enter the Ghost Finders ready to confront the enraged poltergeist and battle for the students very souls It's all in a day's work for the Carnacki Institute operatives except this day is going to get very nasty indeed What they're about to discover is that another entity had also breached the veil between worlds and crossed the threshold into ours and they soon realise that it's not just four lives at stake but all lives humanity itself is being threatened with annihilation *Voices From Beyond* is the fifth book in New York Times bestselling author Simon R. Green's Ghost Finders series **Backpacker**, 2000-03 Backpacker brings the outdoors straight to the reader's doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world's first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker's Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured Nature Sir Norman Lockyer, 1911 Foods of the Gods Gary Westfahl, George Edgar Slusser, Eric S. Rabkin, 1996 Gluttony and starvation pleasure and pain growth and decay These and other extremes of our condition related to food though all but banned from the civilized tables of mainstream fiction are ideal topics for the undomesticated free roaming modes of fantasy As acts and ideas food and eating are fundamental to all that makes us human and dominate our symbolic realms of art literature and cuisine These essays show us the power of speculative modes of fiction to help us look anew at prehistorical and psychomythical attitudes toward food and eating historical Western cultural attitudes toward the material fact of food and the necessity of eating and the relationship between attitudes toward food and how how much when and where we eat The contributors come from a variety of backgrounds including anthropology film and French Russian English and medieval literature Ranging in their focus from shamans to cannibals utopias to social Darwinism muscle magazines to supermarket tabloids the contributors discuss the theory and practice of science fictional eating the dialectic at the level of eating between individual needs and collective norms and the ways that eating habits and the availability and choice of food serve to contextualize and demarcate modern fictional genres In addition to discussing such writers as C S Lewis Stephen King Octavia Butler Jonathan Swift and Anne Rice the contributors also consider such films as *Indiana Jones and the Temple of Doom* and *Cocteau's Beauty and the Beast* **The Athenaeum**, 1876 Human Animals Frank Hamel, 2019-11-21 In *Human Animals* Frank Hamel explores the intricate

relationship between humanity and the natural world weaving a rich tapestry of narrative prose that delves into the evolutionary connections that bind us to the animal kingdom Hamel's literary style is marked by its eloquent descriptions and philosophical insights inviting readers to reflect deeply on the shared instincts and behaviors between humans and animals Set against the backdrop of late 19th century scientific inquiry the book engages with contemporary debates surrounding Darwinism and anthropomorphism pushing the boundaries of how we perceive both humanity and wildlife within a rapidly industrializing society Frank Hamel an influential writer and a keen observer of human and animal behavior drew from his extensive research and personal experiences in wildlife observation to craft this profound work His background in literature and natural history propelled him to investigate the philosophical implications of the human animal bond ultimately guiding him to explore themes of empathy coexistence and moral responsibility This unique perspective makes Hamel a pioneering voice in environmental literature I highly recommend reading *Human Animals* to anyone interested in the interconnectedness of life on Earth This compelling blend of science ethics and literature will appeal to environmentalists animal lovers and those seeking a deeper understanding of our place within the biosphere Hamel's insights remain remarkably relevant as we continue to confront the challenges of coexistence in an increasingly fragmented world **Athenaeum** James Silk
