

ENGINE MECHANICAL - EM

ZD30DDTi Glow Plugs

Once again the Glow system construction & operation is near identical to the previous ZD Engine.

It is necessary to remove the Glow Plugs in order to measure the Engine Compression.

NOTE: The same SST adapter for measuring compression is carried over from the previous ZD30 engine. SST# ED19600620 or ED19600620AUS. Refer to section EM of the Service Manual for more information on the removal process of the Glow Plugs as well as checking Engine Compression. Section EC of the Service Manual discusses the operation of the Glow Plugs.

ZD30DDTi Vacuum Pump

The Vacuum Pump continues to be engine driven & is located on the RH side of the engine.

NOTE:

As part of a "Lack of Power" trouble diagnosis, ALWAYS ensure that the vacuum pump is functioning OK. If the vacuum pump is worn & it is not providing sufficient vacuum, the turbo will not operate properly. As a result the engine will lack power due to lack of Turbo Boost.

ZD30DDTi Camshafts & Cyl Head

The construction of the Cylinder Head is similar to that on the previous ZD Engine. However the Camshaft Signal Plate & sensor (CMPS) is located at the front of the head. (The previous ZD CMPS is located within the Injector Pump.)

The valves (like the previous ZD as well as the YD engine) are shim adjustable. However valve clearance adjustment is NOT required unless there is a problem. (See over page for more detail)

Refer to section EM of the Service Manual for more information on the components shown right. Refer to **STB EM 04-002** for information regarding some pre CRD ZD30 engines that have a 1 piece valve lifter assembly. (No shims)
