The 'Early Medieval' Origins of India Manu V. Devadevan,2020-12-03 India is generally regarded as a civilization with a set of intrinsic attributes that emerged in the age of the Vedas or better still in the Harappan times In recent decades historical studies have moved away from rigid perspectives of singularity in origin and expansion the emphasis now is on pluralities and long term processes spanning centuries and millennia There is also an influential school of thought which rejects antiquity claims such as these and holds that India is a construct of the colonial and nationalist imagination In his radical reinterpretation of India s past Manu V Devadevan moves away from these reifying assessments to examine the evolution of institutions ideas and identities that are characterized typically as Indian In lieu of endorsing their Indianness he traces their emergence to specific conditions that developed in India between 600 and 1200 CE a period which historians now call the early medieval

Perhaps the most recognizable of the material forms of Hinduism, temples are lived, dynamic spaces. They are significant sites for the creation of cultural heritage both in the past and in the present. Drawing on historiographical surveys and in-depth case studies, the volume centres the material form of the Hindu temple as an entry point to study its many adaptations and transformations from the early centuries CE to the 20th century. It highlights the vibrancy and dynamism of the shrine in different locales and studies the active participation of the community for its establishment, maintenance and survival. The illustrated handbook takes a unique approach by focusing on the social base of the temple rather than its aesthetics or chronological linear development. It fills a significant gap in the study of Hinduism and will be an indispensable resource for scholars of archaeology, Hinduism, Indian history, religious studies, museum studies, South Asian history and Southeast Asian history.
