[Zero History](#) William Gibson, 2010-09-07 Hollis Henry never intended to work for global marketing magnate Hubertus Bigend again But now she s broke and Bigend has just the thing to get her back in the game Milgrim can disappear in almost any setting and his Russian is perfectly idiomatic so much so that he spoke it with his therapist in the secret Swiss clinic where Bigend paid for him to be cured of his addiction Garreth doesn t owe Bigend a thing But he does have friends from whom he can call in the kinds of favors powerful people need when things go sideways They all have something Bigend wants as he finds himself outmaneuvered and adrift after a Department of Defense contract for combat wear turns out to be the gateway drug for arms dealers so shadowy they can out Bigend Bigend himself *Zero History* is Gibson s best yet a triumph of science fiction as social criticism and adventure BoingBoing net

[A Poetics of Trauma after 9/11](#) Katharina Donn, 2016-10-04 The 9 11 attacks brought large scale violence into the 21st century with force and have come to epitomize the entanglement of intimate vulnerability and virtual spectacle that is typical of the globalized present This book works at the intersection of trauma studies affect theory and literary studies to offer radically new interpretive frames for interrogating the challenges inherent in representing the initial moments of the terrorist encounter Beyond the paradigm of traumatic unspeakability post 9 11 texts expose the materiality of the human body in its universal vulnerability The intersubjective empathy this engenders is politically subversive as it undermines the discourse of historical singularity and exceptionalism by establishing a global network of reference and dialogue Innovative theoretical interconnections between clinical pathology concepts of cultural trauma and political aesthetics lay the foundations for exploring formally and geographically diverse texts Close readings of works by Jonathan Safran Foer Art Spiegelman Don DeLillo and William Gibson map the relationship between representations of 9 11 and complex aspects of trauma theory This detailed approach

makes a case for revisiting trauma theory and bringing its Freudian origins into the digitized present It showcases trauma as a physical and psychological wound as well as an experience that is simultaneously pre discursive and inhibited by the virtuality of the present day real Exploring how contemporary trauma studies can take into account the digitization and virtuality of present day realities this book is a key intervention in establishing a contemporary ethics of witnessing terror

Technovisuality Helen Grace, Amy Chan Kit-Sze, Wong Kin Yuen, 2015-12-23 How should we regard the contemporary proliferation of images Today visual information is available as projected printed and on screen imagery in the forms of video games scientific data virtual environments and architectural renderings Fearful and anti visualist responses to this phenomenon abound Spread by digital technologies images are thought to threaten the word and privilege surface value over content Yet as they multiply images face unprecedented competition for attention This book explores the opportunities that can arise from the ubiquity of visual stimuli It reveals that technovisuality the fusion of digital technology with the visual can work wonders not so much dazzling audiences with special effects as reviving our enchantment with popular culture Introducing a new term for an entirely new field of academic study this book reveals the centrality of technovisuality in 21st century life

Transnationalism, Activism, Art Kit Dobson, Áine McGlynn, 2013-01-01 Banksy is known worldwide for his politically subversive works of art but he is far from the only artist whose creations are infused with internationally relevant activist themes How else can the arts help activate citizen participation in social justice movements Moreover what is the role of culture in a globalizing world Transnationalism Activism Art goes beyond Banksy by investigating how the three complementary political social and cultural phenomena listed in the title interact in the twenty first century Renowned and emerging critics use current theory on cultural production and politics to illuminate case studies of various media including film literature visual art and performance in their multiple manifestations from electronic dance music to Wikileaks to bestselling poetry collections By addressing how these artistic media are used to enact citizen participation in social justice movements the volume makes important connections between such participation and scholarly study of globalization and transnationalism

The Ethos of Digital Environments Susanna Lindberg, Hanna-Riikka Roine, 2021-05-27 While self driving cars and autonomous weapon systems have received a great deal of attention in media and research the general requirements of ethical life in today s digitalizing reality have not been made sufficiently visible and evaluable This collection of articles from both distinguished and emerging authors working at the intersections of philosophy literary theory media and technology does not intend to fix new moral rules Instead the volume explores the ethos of digital environments asking how we can orient ourselves in them and inviting us to renewed moral reflection in the face of dilemmas they entail The authors show how contemporary digital technologies model our perception narration as well as our conceptions of truth and investigate the ethical moral and juridical consequences of making public and societal infrastructures computational They argue that we must make the structures of the digital environments visible and learn to care for them

Companion to Twentieth-Century Literatures in English Brian McHale, 2006-06-28 An imaginatively constructed new literary history of the twentieth century This companion with a difference sets a controversial new agenda for literary historical analysis Far from the usual forced march through the decades genres and national literatures this reference work for the new century cuts across familiar categories focusing instead on literary hot spots Freud's Vienna and Conrad's Congo in 1899 Chicago and London in 1912 the Somme in July 1916 Dublin London and Harlem in 1922 and so on down to Bradford and Berlin in 1989 the fatwa against Salman Rushdie the new digital media Stockholm in 1993 Toni Morrison's Nobel Prize and September 11 2001

The Globalization of Regional Clusters Dirk Fornahl, Nils Grashof, 2021-04-30 Addressing the role of regional clusters in the context of ongoing globalization this timely book investigates the two seemingly competing trends of globalization and localization from both quantitative and qualitative perspectives International case studies offer pioneering insights into the internationalization process of regional clusters and the effect of this on regional as well as firm performance

How to Read a Moment Mathias Nilges, 2021-03-15 In How to Read a Moment Mathias Nilges shows that time is inseparable from the stories we tell about it demonstrating that the contemporary American novel offers new ways to make sense of the temporality that governs our present Time is a thing that grows scarcer every day observes one of Don DeLillo's characters The future is gone The Baffler argues Where's my hoverboard a meme demands Contemporary capitalism a system that insists that everything happen at once creates problems for social thought and narrative alike After all how does one tell the time of instantaneity In this moment of on demand service and instant trading it has become difficult to imagine the future The novel emerged as the art form of a rapidly changing modern world a way of telling time in its progress Nilges argues that this historical mission is renewed today through works that understand contemporaneity as a form of time shaping that props up our material world and cultural imagination But the contemporary American novel does not simply associate our present with a crisis of futurity Through analyses of works by authors such as DeLillo Jennifer Egan Charles Yu and Colson Whitehead Nilges illustrates that the novel presents ways to make sense of the temporality that controls our purportedly fully contemporary world In so doing the novel recovers a sense of possibility and hope forwarding a dazzling argument for its own importance today

Hyperdocumentation Olivier Le Deuff, 2021-08-25 The term hyperdocumentation is a hyperbole that seems to characterize a paradox The leading discussions on this topic bring in diverse ideas such as that of data the fantasy of Big Data cloud computing artificial intelligence algorithmic processing the flow of information and the outstanding successes of disinformation The purpose of this book is to

show that the current context of documentation is just another step in human construction that has been ongoing for not centuries but millennia and which since the end of the 19th century has been accelerating Coined by Paul Otlet in 1934 in his *Traite de Documentation* hyperdocumentation refers to the concept of documentation that is constantly being expanded and extended in its functionalities and prerogatives While according to Otlet everything could potentially be documented in this way increasingly we find that it is our lives that are being hyperdocumented Hyperdocumentation manifests as an increase not only in the quantity of information that is processed but also in its scope as information is progressively integrated across areas that were previously poorly documented or even undocumented **Exploring the Limits of the Human through**

Science Fiction Gerald Alva Miller Jr.,2012-12-04 Through its engagement with different kinds of texts *Exploring the Limits of the Human through Science Fiction* represents a new way of approaching both science fiction and critical theory and its uses both to question what it means to be human in digital era *Literature and Terrorism* ,2012-01-01 The years following the attacks of September 11 2001 have seen the publication of a wide range of scientific analyses of terrorism Literary studies seem to lag curiously behind this general shift of academic interest The present volume sets out to fill this gap It does so in the conviction that the study of literature has much to offer to the transdisciplinary investigation of terror not only with respect to the present post 9 11 situation but also with respect to earlier historical contexts Literary texts are media of cultural self reflection and as such they have always played a crucial role in the discursive response to terror both contributing to and resisting dominant conceptions of the causes motivations dynamics and aftermath of terrorist violence By bringing together experts from various fields and by combining case studies of works from diverse periods and national literatures the volume *Literature and Terrorism* chooses a diachronic and comparative perspective It is interested in the specific cultural work performed by narrative and dramatic literature in the face of terrorism focusing on literature s ambivalent relationship to other competing modes of discourse *Apocalyptic Discourse in Contemporary Culture* Monica Germana,Aris Mousoutzanis,2014-09-15 This interdisciplinary collection of essays focuses on critical and theoretical responses to the apocalypse of the late twentieth and early twenty first century cultural production Examining the ways in which apocalyptic discourses have had an impact on how we read the world s globalised space the traumatic burden of history and the mutual relationship between language and eschatological belief fifteen original essays by a group of internationally established and emerging critics reflect on the apocalypse its past tradition pervasive present and future legacy The collection seeks to offer a new reading of the apocalypse understood as a complex and frequently paradoxical paradigm of contemporary Western culture The majority of published collections on the subject have been published prior to the year 2000 and in their majority of cases locate the apocalypse in the future and envision it as something imminent This collection offers a post millennial perspective that perceives the end as immanent and simultaneously rooted in the past tradition *Outlaws and Spies* McCarthy Conor McCarthy,2020-03-18 By reading two bodies of literature not normally read

together the outlaw literature and espionage literature Conor McCarthy shows how these genres represent and critique the longstanding use of legal exclusion as a means of supporting state power Texts discussed range from the medieval Robin Hood ballads Shakespeare's history plays and versions of the Ned Kelly story to contemporary writing by John le Carre Don DeLillo Ciaran Carson and William Gibson Big Data Revolution Rob Thomas, Patrick McSharry, 2015-03-02 Exploit the power and potential of Big Data to revolutionize business outcomes Big Data Revolution is a guide to improving performance making better decisions and transforming business through the effective use of Big Data In this collaborative work by an IBM Vice President of Big Data Products and an Oxford Research Fellow this book presents inside stories that demonstrate the power and potential of Big Data within the business realm Readers are guided through tried and true methodologies for getting more out of data and using it to the utmost advantage This book describes the major trends emerging in the field the pitfalls and triumphs being experienced and the many considerations surrounding Big Data all while guiding readers toward better decision making from the perspective of a data scientist Companies are generating data faster than ever before and managing that data has become a major challenge With the right strategy Big Data can be a powerful tool for creating effective business solutions but deep understanding is key when applying it to individual business needs Big Data Revolution provides the insight executives need to incorporate Big Data into a better business strategy improving outcomes with innovation and efficient use of technology Examine the major emerging patterns in Big Data Consider the debate surrounding the ethical use of data Recognize patterns and improve personal and organizational performance Make more informed decisions with quantifiable results In an information society it is becoming increasingly important to make sense of data in an economically viable way It can drive new revenue streams and give companies a competitive advantage providing a way forward for businesses navigating an increasingly complex marketplace Big Data Revolution provides expert insight on the tool that can revolutionize industries *Shakespeare and Posthumanist Theory* Karen Raber, 2018-04-05 Shakespeare and Posthumanist Theory charts challenges in the field of Shakespeare studies to the assumption that the category human is real stable or worthy of privileging in discussions of the playwright's work Drawing on a variety of methodologies cognitive theory systems theory animal studies ecostudies the new materialisms the volume investigates the world of Shakespeare's plays and poems in order to represent more thoroughly its variety its ethics of inclusion and its resistance to human triumphalism and exceptionalism Karen Raber a leading scholar in the field clearly and cogently guides the reader through complex theoretical terrain providing fresh exciting readings of plays including Othello The Tempest Titus Andronicus Troilus and Cressida and Henry IV Part 1 Beyond Cyberpunk Graham J. Murphy, Sherryl Vint, 2010-06-10 This book is a collection of essays that considers the continuing cultural relevance of the cyberpunk genre into the new millennium Cyberpunk is no longer an emergent phenomenon but in our digital age of CGI driven entertainment the information economy and globalized capital we have never more been in need of a fiction capable of engaging with a world shaped by information technology The essays in

explore our cyberpunk realities to soberly reconsider Eighties era cyberpunk while also mapping contemporary cyberpunk. The contributors seek to move beyond the narrow strictures of cyberpunk as defined in the Eighties and contribute to an ongoing discussion of how to negotiate exchanges among information technologies, global capitalism, and human social existence. The essays offer a variety of perspectives on cyberpunk's diversity and how this sub genre remains relevant amidst its transformation from a print fiction genre into a more generalized set of cultural practices tackling the question of what it is that cyberpunk narratives continue to offer us in those intersections of literary, cultural, theoretical, academic, and technocultural environments.
