World Bank Staff Working Paper ,1984 The Journal of Developing Areas ,1976 **Trials of Convergence** Arthur van Riel,2021-06-22 For over a century now historians have debated the causes of the lagged industrialization of the Dutch economy during the nineteenth century To this debate Trials of Convergence brings the analytical perspective of prices factor costs and the functioning of markets Its critical insight is that only an approach based on the integrated incentive structure of the economy allows us to delimit the role of alternative explanations Using statistical reconstruction and microdata it shows that the retarded transition resulted from a confluence of forces These ranged from open economy effects and natural endowments to the resilient influence of the institutions of the former Dutch Republic and the fiscal policy adopted in response to Belgian secession At the height of the British Industrial Revolution the Dutch economy slowed triggering a return to the problems of eighteenth century stagnation All this meant that the transition to modern economic growth after 1860 came about only in a changed international context and after a period of politico economic reform
