Biodiversity Islands: Strategies for Conservation in Human-Dominated Environments Florencia Montagnini, 2022-04-22. This book is intended to provide an overview for the identification and establishment of biodiversity islands. It presents examples and case studies where the biodiversity islands approach is being used in a variety of locations and contexts worldwide. It will contribute to design parameters on appropriate sizing and spatial distribution of biodiversity islands in order to be effective in conservation and regeneration across the landscape using integrated landscape management approaches. This book is essential given the current worldwide trend of habitat destruction and the need to preserve biodiversity and its values. The chapters are organized in five sections. The first section provides the introduction. Section 2, 3, and 4 discuss the challenges and alternatives of establishment and management case studies across the globe, safeguarding of the environmental, economic, and social benefits, and the final section offers a conclusion. The contributing authors present views from the academic, the practitioner, and the policymaker perspectives, offering alternatives and suggestions for promoting strategies that support biodiversity conservation through intentionally designed frameworks for sustainable forest landscapes. Readers will discover suggestions and concrete examples that can be used by a variety of stakeholders in various settings throughout the world. This book is useful to researchers, farmers, foresters, landowners, land managers, city planners, and policy makers alike.

Gardens Through the Ages: A Journey into the History of Plants and their Cultural Impact Pasquale De Marco, 2025-07-09. Gardens have been a part of human civilization for millennia, serving as places of beauty, tranquility, and sustenance. From the earliest cultivated fields to the elaborate gardens of royalty, gardens have reflected the values, beliefs, and aspirations of the societies that created them. In this book, we will take a journey through the history of gardens from their humble origins to their modern-day incarnations. We will explore the different types of gardens that have been created throughout history, from the formal gardens of ancient Egypt to the naturalistic gardens of the modern era. We will also examine the role that gardens have played in human culture, from their use as places of worship and meditation to their role as sources of food and medicine. Through this journey, we will come to appreciate the importance of gardens in our lives. Gardens are places where we can connect with nature, find peace and tranquility, and learn about the world around us. They are also places where we can grow our own food, create beauty, and share our love of nature with others. This book is a comprehensive exploration of the history of gardens, covering a wide range of topics, including the origins of gardening, the development of different types of gardens throughout history, the role of gardens in different cultures and societies, the influence of gardens on art, literature, and music, the use of gardens for food production, medicine, and other practical purposes, and the importance of gardens for

conservation and sustainability This book is a valuable resource for anyone interested in the history of gardens landscape architecture or the role of nature in human culture It is also a beautiful and inspiring book that will appeal to anyone who loves gardens and the natural world If you like this book write a review
