Advanced Molecular Gastronomy Elke Scholten,Jean-Paul Vincken,Peter Klosse,2017

Cooking in Russia - Volume 3 Greg Easter,2016-07-11 In

this third installment the author expounds on the principles of organic chemistry as it relates to food science interwoven with more than 50 detailed recipes most of which have accompanying online videos This unusual book fills a niche that is sorely missing in the literature Namely how specific flavors are produced by chemical reactions during cooking and how those reactions can be manipulated to improve results There are diagrams tables and explanations covering over 25 different topics If you have ever wondered about such things as what the exact differences are between types of onions or what bay leaves actually do at the chemical level or what makes foods a certain color and what that color indicates or why fresh tomatoes are sometimes combined with pureed tomatoes in sauces or the science of how flambeing changes the flavor profile of a dish or why stocks have to be simmered at a specific temperature for optimum results and many other such questions here are the scientifically accurate answers presented in clear language The text is also sprinkled with tidbits of food history and a humorous take on life in restaurant kitchens Perhaps even more valuable for chefs and serious cooks the author introduces a never before seen method for producing your own tertiary flavorings which are those psychologically tantalizing additives that are the trade secrets of commercial food manufacturers Only instead of using bottles of chemicals here this is accomplished using only natural foods ordinary kitchen equipment and a brilliant novel technique There is also an extensive glossary of terms relating to beers and wines at the back of the book If you are an aspiring chef you absolutely need this book Understanding food chemistry has never been more important than in this age of molecular gastronomy This isn't just dry theory You will be able to make use of these methods in any commercial or home kitchen immediately

Molecular Cooking at Home Jozef Youssef, 2013 This book teaches the experienced home cook how to practice dozens of the most common techniques used in molecular cooking From synthesizing flavours together to using dry ice to create a visual impact at presentation there are countless ways to enhance
