Modern Financial Regulation:

Modern Financial Regulation Jonathan Kirk, James Ross (Lawyer), 2013 Modern Financial Regulation is a practical guide to the UK's Financial Services Act 2012. This new legislation will bring about major structural and regulatory changes to financial services including abolition of the UK's Financial Services Authority which is to be replaced with the Financial Conduct Authority and the Prudential Regulation Authority. Introduction of light touch regulation to be replaced by far more robust regime of regulatory civil injunctive and criminal enforcement. A new consumer focused investigative and prosecution authority that will regulate consumer markets. A focus on principles based enforcement which mirrors the approach to consumer law of the Consumer Protection from Unfair Trading Regulations. The Financial Services Act 2012 amends and consolidates various statutory provisions and dovetails with several discrete areas of financial regulation including money laundering, insider trading and cartel offenses. This new guide explains how all these various strands interlock and how the new approaches are likely to work in practice. Modern Financial Regulation will be essential reading for anyone who requires an understanding of the UK legal framework underpinning the financial services sector. Contents include an introduction and history of UK financial regulation, an overview of new regulatory framework, prudential regulation, authority, Financial Conduct Authority, money laundering, payment services, regulations, e-money, cartels, competition and insider dealing, consumer credit.

European Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza, 2019-12-26. Mirroring the long established structure of the financial industry, EU financial regulation as we know it today approaches banking, insurance and investment services separately and often divergently. In recent decades, however, the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries. As the contours of the traditional tripartition in the financial industry have faded, the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality. This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective. For each specific research theme including prudential regulation, corporate governance and conduct of business rules, the similarities as well as gaps, overlaps and unjustifiable differences between banking, securities and insurance regulation are clearly presented and discussed. This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes.
