Dubber, Christopher Tomlins, 2018-08-02 Some of the most exciting and innovative legal scholarship has been driven by historical curiosity Legal history today comes in a fascinating array of shapes and sizes from microhistory to global intellectual history Legal history has expanded beyond traditional parochial boundaries to become increasingly international and comparative in scope and orientation Drawing on scholarship from around the world and representing a variety of methodological approaches areas of expertise and research agendas this timely compendium takes stock of legal history and methodology and reflects on the various modes of the historical analysis of law past present and future Part I explores the relationship between legal history and other disciplinary perspectives including economic philosophical comparative literary and rhetorical analysis of law Part II considers various approaches to legal history including legal history as doctrinal intellectual or social history Part III focuses on the interrelation between legal history and jurisprudence by investigating the role and conception of historical inquiry in various models schools and movements of legal thought Part IV traces the place and pursuit of historical analysis in various legal systems and traditions across time cultures and space Finally Part V narrows the Handbooks focus to explore several examples of legal history in action including its use in various legal doctrinal contexts **Mediterranean Modernism**

Adam J. Goldwyn, Renée M. Silverman, 2016-08-19 This book explores how Modernist movements all across the Mediterranean basin differed from those of other regions The chapters show how the political and economic turmoil of a period marked by world war revolution decolonization nationalism and the rapid advance of new technologies compelled artists writers and other intellectuals to create a new hybrid Mediterranean Modernist aesthetic which sought to balance the tensions between local and foreign tradition and innovation and colonial and postcolonial **A Mirror for History** Marc Egnal, 2024-05-07 In this book Marc Egnal argues that the arc of middle class culture reflects the evolution of the economy from the near subsistence agriculture of the 1750s to the extraordinarily unequal society of the twenty first century By using literature and art to explain the shifts in values over this lengthy span and highlighting class conflict within the American economy over time Egnal offers particularly unique insights into the development of middle class America By delving into a myriad of fictional characters and their complex worlds Egnal sheds light on an array of issues including the shifting roles of women in society the resulting changes in masculinity waning religious beliefs through the centuries and a broad exploration of African American characters **Cities and Literature** Malcolm Miles, 2018-10-03 This book offers a critical introduction to the relation between cities and literature fiction poetry and literary criticism from the late eighteenth to twenty first centuries It examines examples of writing from Europe North America and post colonial countries juxtaposed with key ideas from urban cultural and critical theories Cities and Literature shows how literature frames real and imagined constructs and experiences of cities Arranged thematically each chapter offers a narrative which introduces a number of key thinkers and writers whose vision illuminates the prevailing idea of the city at the time The themes are extended or challenged by boxed cases of specific texts or images accompanied by short critical commentaries the structure provides readers with a map of the terrain enabling connections across time and place within manageable limits and offers elements of critical discussion to serve a growing number of university courses which involve the intersections of cities and literature This volume offers access to literature from an urban perspective for the social sciences and access to urbanism from a literary viewpoint It is an excellent resource for both undergraduate and postgraduate students in the fields of urban studies and English literature planning cultural and human geographies architecture cultural studies and cultural policy **The Turn to Process** Kunal M. Parker, 2023-11-16 In The Turn to Process Kunal M Parker explores the massive reorientation of American legal political and economic thinking between 1870 and 1970 Over this period American conceptions of law democracy and markets went from being oriented around truths ends and foundations to being oriented around methods processes and techniques No longer viewed as founded in justice and morality law became a way of doing things centered around legal procedure Shedding its foundations in the people democracy became a technique of governance consisting of an endless process of interacting groups Liberating themselves from the truths of labor markets and market actors became intellectual and political techniques without necessary grounding in the reality of human behavior Contrasting nineteenth and twentieth

century legal political and economic thought this book situates this transformation in the philosophical crisis of modernism and the rise of the administrative state **All Good Books Are Catholic Books** Una M. Cadegan, 2013-09-15 Until the close of the Second Vatican Council in 1965 the stance of the Roman Catholic Church toward the social cultural economic and political developments of the twentieth century was largely antagonistic Naturally opposed to secularization skeptical of capitalist markets indifferent to questions of justice confused and appalled by new forms of high and low culture and resistant to the social and economic freedom of women in all of these ways the Catholic Church set itself up as a thoroughly anti modern institution Yet in and through the period from World War I to Vatican II the Church did engage with react to and even accommodate various aspects of modernity In **All Good Books Are Catholic Books** Una M Cadegan shows how the Church's official position on literary culture developed over this crucial period The Catholic Church in the United States maintained an Index of Prohibited Books and the National Legion of Decency founded in 1933 lobbied Hollywood to edit or ban movies pulp magazines and comic books that were morally suspect These regulations posed an obstacle for the self understanding of Catholic American readers writers and scholars But as Cadegan finds Catholics developed a rationale by which they could both respect the laws of the Church as it sought to protect the integrity of doctrine and also engage the culture of artistic and commercial freedom in which they operated as Americans Catholic literary figures including Flannery O Connor and Thomas Merton are important to Cadegan's argument particularly as their careers and the reception of their work demonstrate shifts in the relationship between Catholicism and literary culture Cadegan trains her attention on American critics editors and university professors and administrators who mediated the relationship among the Church parishioners and the culture at large **The City Reader** Richard T. values coming to terms with a darker view of human nature mass culture and its dangers the rise of the politics of irrationality identity and the other in Western civilization new ways to represent the postwar world the epistemological dilemma in a world of uncertainty and the new Fascism was it a new norm or an aberration Arthur Haberman sees 1930 as a watershed year in the intellectual life of Europe and with this book the first to see the contributions of the public intellectuals of 1930 as a single entity he forces a reconsideration and reinterpretation of the period Writing the Harlem Renaissance Emily Allen Williams,2017-04-26 The contributors in this study examine the historical Harlem community during its renaissance period as well as its present day community A cursory investigation of the existent that focus on the Harlem community during its renaissance of the early twentieth century reveals that the compilations are primarily ones that present the subjects life stories through the lens of praise songs This book however presents the Harlem community through a lens that reveals more grounded and researched analyses that bring the influences and contributions of the Harlem Renaissance to a level of relevance in the twenty first century from one or more critical vantage points This study aims to move beyond the more obvious and foregrounded artistic contributions towards analyses of the Harlem Renaissance alongside analyses of a twenty first century Harlem community and its present day contributions **The Gateway Arch** Tracy Campbell,2019-06-18 This fascinating engaging history of St Louis s monument to American expansion reveals a story of greed discrimination and community displacement NextSTL.com Rising to a triumphant height of 630 feet the Gateway Arch is one of the world s most widely recognized structures and attracts millions of tourists to St Louis every year Envisioned in 1947 but not completed until the mid 1960s its story is one of innovation and greed civic pride and backroom deals Weaving together social political and cultural perspectives historian Tracy Campbell uncovers the complicated and troubling history of this iconic symbol In this revealing account Campbell shows that the so called Gateway to the West was the scheme of shrewd city leaders who were willing to steal an election destroy historic buildings and drive out communities in order to make downtown St Louis more profitable Campbell also tells the human story of the architect Eero Saarinen whose prize winning design brought him acclaim but also charges of plagiarism and who didn t live to see the completion of his vision Polish, Hybrid, and Otherwise George Z.
