## **Modernity And Consumption:**

*Consumer Culture and Modernity* Don Slater, 1999-02-03 This book provides a comprehensive introduction to the issues concepts and theories through which people have tried to understand consumer culture throughout the modern period and puts the current state of thinking into a broader context Thematically organized the book shows how the central aspects of consumer culture such as needs choice identity status alienation objects culture have been debated within modern theories from those of earlier thinkers such as Marx and Simmel to contemporary forms of post structuralism and postmodernism This approach introduces consumer culture as a subject which far from being of narrow or recent interest is intimately tied to the central issues of modern times and modern social thought With its reviews of major theorists set within a full account of the development of the subject this book should be of interest to undergraduate and postgraduate students in the many disciplines which now study consumer culture including communications and cultural studies anthropology and history

**Modernity and Consumption** Antonio Leopold Rappa, 2002      *Modernity & Consumption* Antonio L. Rappa, 2002

**Consumer Culture and Postmodernism** Mike Featherstone, 2007-07-11 The first edition of this contemporary classic can claim to have put consumer culture on the map certainly in relation to postmodernism This expanded new edition includes a fully revised preface that explores the developments in consumer culture since the first edition a major new chapter on Modernity and the Cultural Question an update on postmodernism and the development of contemporary theory after postmodernism an account of multiple and alternative modernities the challenges of consumer culture in Japan and China The result is a book that shakes the boundaries of debate from one of the foremost writers on culture and postmodernism of the present day      *Consumer Culture, Modernity and Identity* Nita Mathur, 2019-01-17 This book offers

analysis of articulation of consumer culture and modernity in everyday lives of people in a transnational framework It pursues three broad themes lifestyle choices and construction of modern identities fashion and advertising and subaltern concerns and moral subjectivities It juxtaposes empirical studies with theoretical traditions in addressing questions such as How do people imagine modernity and identity in consumer culture What does modernity or being modern mean to people in different societies Are modernity and tradition antithetical to or develop an interface with each other The chapters in the book trace manifestations and trajectories of consumer culture and modernity as they connect to develop a sense of renewed identity      **The Politics of Consumption in the Modern Age** Charris De Smet, Ilja Van Damme, Marnix Beyen, 2025-09-26

This volume explores the intersection of political history and consumption history by conceptualizing the politics of consumption as a discursive process in which consumers and acts of consumption are framed and politicized by state and market driven actors for broader societal objectives Drawing on a diverse range of case studies from the North Atlantic world between the early nineteenth century and the 1980s the authors examine how power dynamics shape consumption practices

regulation and discourse The contributions in this study address key themes such as municipal governance of food markets consumer citizenship in political debates the nationalist framing of commodities anti imperial sartorial practices and the rhetoric of consumer austerity during economic crises By situating consumption within the communicative space of political ideologies the volume highlights how discourses around consumption not only reflect but also actively construct social hierarchies national identities and economic policies Ultimately the study underscores the necessity of integrating discursive approaches with material analyses to deepen our historical understanding of the politicization of consumption This book will appeal to students researchers and scholars of political history consumption studies and cultural history The chapters in this book were originally published as a special issue of *History of Retailing and Consumption* *Religion, Modernity, Globalisation* François Gauthier, 2019-09-30 This book argues that the last four decades have seen profound and important changes in the nature and social location of religion and that those changes are best understood when cast against the associated rise of consumerism and neoliberalism These transformations are often misunderstood and underestimated namely because the study of religion remains dependent on the secularisation paradigm which can no longer provide a sufficiently fruitful framework for analysis The book challenges diagnoses of transience and fragmentation by proposing an alternative narrative and set of concepts for understanding the global religious landscape The present situation is framed as the result of a shift from a National Statist to a Global Market regime of religion Adopting a holistic perspective that breaks with the current specialisation tendencies it charts the emergence of the State and the Market as institutions and ideas related to social order as well as their changing rapports from classical modernity to today Breaking with a tradition of Western centeredness the book offers probing enquiries into Indonesia and a synthesis of global and Western trends This long awaited book offers a bold new vision for the social scientific study of religion and will be of great interest to all scholars of the Sociology and Anthropology of religion as well as Religious Studies in general The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Modernity At Large* Arjun Appadurai, 1996 *medi@sia* T.J.M. Holden, Timothy J. Scrase, 2006-09-27 This new inter disciplinary book is the first comparative case based analysis of media panoply in and out of Asia today Examining what the authors call the media tion equation the contributors demonstrate the multiple links between media society and culture and advance the claim that media is the key means through which Asians experience understand effect and are affected by the worlds containing them Exploring a relatively neglected principle in cultural studies that context counts *medi@sia* highlights how the experiences of those encountering media messages differ depending on social economic political and ideational conditions Balancing social cultural and media theory with empirical research the essays in this collection provide a better understanding of the complex relationship between media and people's practices values and behaviour in contemporary Asia *Zygmunt Bauman on Education in Liquid Modernity* Shaun Best, 2019-06-25

Zygmunt Bauman on Education in Liquid Modernity evaluates the contribution that Bauman has made to education studies. It outlines the central themes within social analysis in Bauman's writings and examines how researchers have applied his key ideas to explore current theoretical issues. The book focuses on Bauman's ideas in relation to the management and consumption of education including topics such as student voice and individual identity relationships and inclusive education. Identifying and discussing underpinning assumptions about Bauman's work and its application to education, the book addresses the connection between his work and wider debates providing a critical and clarifying re-examination of Bauman's contribution to the role of education within solid post and liquid modernity. This book will appeal to academics, researchers and postgraduate students of education theory and the sociology of education. It will be of great interest to readers seeking a critical appreciation and application of Bauman's work to an educational context and Bauman scholars interested in the application of contemporary social theory to education and its role in identity formation in areas such as sex and relationships education.

**Consumption: Theory and issues in the study of consumption** Daniel Miller, 2001

*Consumption and Market Society in Israel* Kalman Applbaum, Yoram S. Carmeli, 2020-05-26 Over the past two decades Israel has been remaking itself in line with the commercial models of Western market societies. Nowhere is this trend more evident than in private consumption patterns. Most Israelis crave parity with Western lifestyles: private automobiles, mobile phones, spacious housing, fashionably furnished accessibility to shopping malls and leisure travel abroad. Alongside these new aspirations, internationally branded commodities and franchises such as McDonald's, Office Depot, Benetton, IKEA and Toys R Us increasingly feature in the Israeli landscape and advertising has emerged as a primary vehicle for persuasion, competition and cultural expression. This book is the first to explore fully the significance of these transformations. The authors show how different groups: kibbutzniks, Israeli Arabs, Ultra Orthodox Jews, new immigrants and middle class Israelis alternately exhibit a suspicion towards and enthusiasm for the enhanced individual freedoms of a consumer market society. Lifestyle consumerism is recognized as an alien import potentially disruptive of the ethos of communality, common destiny and national purpose. At the same time, because consumption helps unite diverse groups to the greater whole of the nation, the globe and modernity, it conveys a sense of normalcy and affluence in a time of major social transition and political turmoil.

**Consumption and Market Society in Israel** is not only innovative in its research but it is a timely contribution to a hotly debated topic.

**Headstrong and Unorthodox Pioneers for a Critical Theory of Consumption** Michael-Burkhard Piorkowsky, Karl Kollmann, 2023-08-28 This volume offers contributions on the fundamentals of current consumption theory and consumption research which have developed almost entirely from originally unorthodox approaches against traditional micro and macroeconomic theory. The inspiration came mainly from social economic behavioural research and ecological economics. But the reception is very patchy and the history is largely forgotten. With reference to the work of earlier authors, new arguments are offered to the current discussion about delimitations and paradoxes in consumption and the still narrowly understood

consumer role It is as much about rework in sharpening the understanding of consumption and consumers in their lifeworlds as it is about indications of fruitfulness for the analysis of open questions It is about arguments for a paradigmatic reorientation of consumer research and policy The contributions address in particular ambivalences options and future modes in consumption in the search for individual satisfaction and ecological sustainability This book is a translation of an original German edition The translation was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation

### **Modernity at the Beginning of the 21st Century** Volker

Schmidt,2008-12-11 Modernity is back on sociology s agenda From the beginnings of sociology as an academic discipline questions surrounding the meaning and consequences of modernity have fascinated generations of sociologists The initial interest in the concept was inspired by a sense of a deep rupture and crisis afflicting European society a sense that society was approaching something fundamentally different from the past an entirely new form of societal organization that bore little resemblance to anything known before Where exactly this transformation was headed was by no means clear but around the 18th century a growing number of European intellectuals and scholars realized that the changes that had been in the making since the late 15th century were irreversible and could not be contained in any particular region or confined to particular sectors of society but would ultimately transform all spheres of life Like other thinkers sociologists observed this transformation with awe and their attitude towards it has always been ambivalent The 20th century during which modernity gradually began to break through globally was also a century during which many sociologists became increasingly disillusioned with the promises of the modern project But with the exhaustion of the energies of postmodernism the intellectual movement that wanted to bury modernity the interest in modernity began to resurface again not least because it became increasingly clear that the world is far from approaching a societal condition pointing systematically beyond modernity Instead we are witnessing an intensification of modernization processes around the world But what is modernity anyway The aim of the present volume is to contribute to the ongoing discussion about the meaning of modernity and about the significance of modernization processes in non Western societies As befits a subject matter as controversial and complex at this one the book s chapters offer no conclusive answers to the questions they raise and address The debate about modernity must and will continue and one hopes that it will be conducted in an atmosphere of mutual respect despite sometimes fierce disagreement between the participants For only if we listen to each other can we make genuine intellectual progress

**Consuming Life** Zygmunt Bauman,2013-05-08 With the advent of liquid modernity the society of producers is transformed into a society of consumers In this new consumer society individuals become simultaneously the promoters of commodities and the commodities they promote They are at one and the same time the merchandise and the marketer the goods and the travelling salespeople They all inhabit the same social space that is customarily described by the term the

market The test they need to pass in order to acquire the social prizes they covet requires them to recast themselves as products capable of drawing attention to themselves This subtle and pervasive transformation of consumers into commodities is the most important feature of the society of consumers It is the hidden truth the deepest and most closely guarded secret of the consumer society in which we now live In this new book Zygmunt Bauman examines the impact of consumerist attitudes and patterns of conduct on various apparently unconnected aspects of social life politics and democracy social divisions and stratification communities and partnerships identity building the production and use of knowledge and value preferences The invasion and colonization of the web of human relations by the worldviews and behavioural patterns inspired and shaped by commodity markets and the sources of resentment dissent and occasional resistance to the occupying forces are the central themes of this brilliant new book by one of the worlds most original and insightful social thinkers

*Consumption* Dr Robert Bocock, Robert Bocock, 2008-02-20 This book analyzes the main post war features of consumption It traces the historical development of consumption and discusses the major contributions made by sociologists in discussing the subject Robert Bocock is Senior Lecturer in Sociology at the Open University The Oxford Handbook of the History of Consumption

Juliana Mansvelt, 2005-04-09 An overview of the research into consumer behaviour and the use of space including the internet identity connections through commodity chains commercial culture and morality *Consuming Symbolic Goods*

Wilfred Dolfsma, 2013-09-13 The phenomenon of consumption has increasingly drawn attention from economists While the sole purpose of production is consumption as Adam Smith has claimed economists have up to recently generally ignored the topic This book brings together a range of different perspectives on the topic of consumption that will finally shed the necessary light on a largely neglected theme such as Why is the consumption of symbolic goods different than that of goods that are not constitutive of individuals identity How does the consumption of symbolic goods affect social processes and economic phenomena Will taking consumption of symbolic goods seriously impact economics itself The book discusses these issues theoretically and through analyses of such cases as food religion fashion empirically as well It also discusses the possible role in the future of consumption This book was previously published as a special issue of Review of Social Economy

*Storying Humanity: Narratives of Culture and Society* Richard Wirth, Dario Serrati, Katarzyna Macedulska, 2019-07-22 This volume was first published by Inter Disciplinary Press in 2015 Since time immemorial storytelling has held a critical place in the heart of human identity Whether for entertainment education artistry or even survival storytelling has served as an integral tool for expression and existence in every society and civilization across the globe Our world has never been more connected with stories of our past available at the touch of a key and the ever advancing present unfolding through personal experiences that are instantaneously narrated online Through stories we may gain perspective into the histories cultures and

experiences of remote places and peoples achieve greater understanding of complex social issues and closed off societies or add to the collective global narrative through blogging and social media This collection presents the reader with multicultural and interdisciplinary academic insight into the ability for storytelling to illuminate our world and narrativize humanity
