## **Modes Of Therapeutic Action:**

*Modes of Therapeutic Action* Martha Stark, 2000-10 How do we position ourselves in relation to our patients Do we participate as neutral object as empathetic self object or as authentic subject Do we strive to enhance the patient's knowledge to provide a corrective experience or to work at the intimate edge

*Modes of Therapeutic Action* Martha Stark, 1999-04 How do we position ourselves moment by moment in relation to our patients and how do these positions inform both what we come to know about our patients and how we intervene Do we participate as neutral object as empathetic self object or as authentic subject Do we strive to enhance the patient's knowledge to provide a corrective experience or to work at the intimate edge In an effort to answer these and other clinically relevant questions about the process of psychotherapeutic change Martha Stark has developed a comprehensive theory of therapeutic action that integrates the interpretive perspective of classical psychoanalysis Model 1 the corrective provision perspective of self psychology and those object relations theories emphasizing the internal absence of good Model 2 and the relational perspective of contemporary psychoanalysis and those object relations theories emphasizing the internal presence of bad Model 3 Model I is about knowledge and insight It is a one person psychology because its focus is on the patient and the internal workings of her mind Model 2 is about corrective experience It is a one and a half person psychology because its emphasis is not so much on the relationship per se but on the filling in of the patient's deficits by way of the therapist's corrective provision what ultimately matters is not who the therapist is but rather what she can offer Model 3 is about relationship the real relationship It is a two person psychology because its focus is on patients and therapists who relate to each other as real people it is about mutuality reciprocity and intersubjectivity Whereas Model 2 is about give and involves the therapist's bringing the best of who she is into the room Model 3 is about give and take and involves the therapist's bringing all of who she is into the room As Dr Stark repeatedly demonstrates in numerous clinical vignettes the three modes of therapeutic action knowledge experience and relationship Dare not mutually exclusive but mutually enhancing If as therapists we can tolerate the necessary uncertainty that comes with the recognition that there is an infinite variety of possibilities for change then we will be able to enhance the therapeutic potential of each moment and optimize our effectiveness as clinicians

*How Talking Cures* Lee Jaffe, 2014-08-20 Sigmund Freud repeatedly revised his understanding of how our minds work how to understand mental illness and how to relieve emotional psychological suffering With each revision however he did not methodically integrate previous ideas with newer ones In *How Talking Cures Revealing Freud's Contributions to All Psychotherapies* a careful review of his concepts at each stage of his thinking reveals six different ways that talking cures six distinct generic modes of therapeutic action by which all present day psychotherapies work Lee Jaffe demonstrates how these therapeutic actions can link treatment recommendations to individual diagnoses and how they function during treatment itself Different views of how psychoanalytic treatments work are analyzed according to their emphasis or de emphasis of these six modes of therapeutic

action As a result comparisons of all approaches to talking cures and decisions about the choice of treatment for a given patient can be grounded in an understanding of the essential ways that each therapeutic procedure works rather than an allegiance to what providers happened to be taught during their training
