Since its emergence in the 1980s, task-based language teaching (TBLT) has been regarded as a language pedagogy that fosters genuine communication and has the capacity to cultivate learners' communicative competence. Consequently, TBLT research has become a vibrant and evolving field with numerous researchers exploring its theoretical foundations and gathering empirical evidence to support or challenge its effectiveness as a language teaching approach (e.g., Ellis, 2017; Erlam, 2016). In his recent publication, *Foundational Principles of Task-based Language Teaching*, Martin East adeptly navigates through the theoretical bases, implementation and assessment of TBLT. By delving into the book, readers will embark on a journey of deepening their understanding of TBLT while gaining valuable insights that inform pedagogical decisions and advance research within this domain.

The book is divided into three sections: *Theorizing TBLT*, *Practicing TBLT*, and *Evaluating TBLT*. These sections arguably represent the three stages of understanding and implementing TBLT. Part I offers an overview of the theoretical perspectives that have underpinned second language acquisition (SLA) and driven the development
