Mohammed And Charlemagne:

Mohammed and Charlemagne Henri Pirenne, 2001-08-28 Remarkable classic that developed the revolutionary theory of how the advance and influence of Islam caused the Europe of the Roman Empire to evolve into the Europe of the Middle Ages An important seminal book worthy to close one of the most distinguished careers in European scholarship Saturday Review of Literature **Mohammed, Charlemagne & the Origins of Europe** Richard Hodges, David Whitehouse, 1983 In this concise book Richard Hodges and David Whitehouse review the Pirenne thesis in the light of archaeological information from northern Europe the Mediterranean and western Asia *Mohammed and Charlemagne* Henri Pirenne, 1958

Mohammed & Charlemagne Revisited Emmet Scott, 2012-01 During the 1920s Belgian historian Henri Pirenne came to an astonishing conclusion the ancient classical civilization which Rome had established throughout Europe and the Mediterranean world was not destroyed by the Barbarians who invaded the western provinces in the fifth century it was destroyed by the Arabs whose conquest of the Middle East and North Africa terminated Roman civilization in those regions and cut off Europe from any further trading and cultural contact with the East According to Pirenne it was only in the mid seventh century that the characteristic features of classical life disappeared from Europe after which time the continent began to develop its own distinctive and somewhat primitive medieval culture Pirenne's findings published posthumously in his *Mohammed et Charlemagne* 1937 were even then highly controversial for by the late nineteenth century many historians were moving towards a quite different conclusion namely that the Arabs were actually a civilizing force who rekindled the light of classical learning in Europe after it had been extinguished by the Goths Vandals and Huns in the fifth century And because Pirenne went so diametrically against the grain of this thinking the reception of his new thesis tended to be hostile Paper after paper published during the 1940s and 50s strove to refute him The most definitive rebuttal however appeared in the early 1980s This was *Mohammed Charlemagne and the Origins of Europe* by English archaeologists Richard Hodges and David Whitehouse These in common with Pirenne's earlier critics argued that classical civilization was already dead in Europe by the time of the Arab conquests and that the Arabs arrived on the scene as civilizers rather than destroyers Hodges and Whitehouse claimed that the latest findings of archaeology fully supported this view and their work was highly influential So influential indeed that over the next three decades Pirenne and his thesis was progressively sidelined so that recent years have seen the publication of dozens of titles in the English language alone which fail even to mention his name In *Mohammed and Charlemagne Revisited* historian Emmet Scott reviews the evidence put forward by Hodges and Whitehouse as well as the more recent findings of archaeology and comes to a rather different conclusion For him the evidence shows that classical civilization was not dead in Europe at the start of the seventh century but was actually experiencing something of a revival Populations and towns were beginning to grow again for the first time since this second century a development apparently attributable largely to the spread of Christianity In addition the real centres of classical civilization in the Middle East were

experiencing an unprecedented Golden Age at the time with cities larger and more prosperous than ever before. Excavation has shown that these were destroyed thoroughly and completely by the Arab conquests with many never again reoccupied. And it was precisely then, says Scott, that Europe's classical culture also disappeared with the abandonment of the undefended lowland villas and farms of the Roman period and a retreat to fortified hilltop settlements, the first medieval castles. For Scott, archaeology demonstrated that the Arabs did indeed blockade the Mediterranean through piracy and slave raiding, precisely as Pirenne had claimed, and he argues that the disappearance of papyrus from Europe was an infallible proof of this. Whatever classical learning survived after this time, says Scott, was due almost entirely to the efforts of Christian monks. The Pirenne thesis has taken on a new significance in the post 9/11 world. Scott's take on the theory will certainly ignite further and perhaps heated debate.

Mohammed and Charlemagne Henri Pirenne, Jacques Pirenne, 1939. Remarkable classic that developed the revolutionary theory of how the advance and influence of Islam caused the Europe of the Roman Empire to evolve into the Europe of the Middle Ages, an important seminal book worthy to close one of the most distinguished careers in European scholarship. *Saturday Review of Literature*.

Mohammed and Charlemagne Elizabeth A. R. Brown, 1943. Power and Plenty Ronald Findlay, Kevin H.

O'Rourke, 2009-08-10. International trade has shaped the modern world yet until now no single book has been available for both economists and general readers that traces the history of the international economy from its earliest beginnings to the present day. *Power and Plenty* fills this gap, providing the first full account of world trade and development over the course of the last millennium. Ronald Findlay and Kevin O'Rourke examine the successive waves of globalization and deglobalization that have occurred during the past thousand years, looking closely at the technological and political causes behind these long-term trends. They show how the expansion and contraction of the world economy has been directly tied to the two-way interplay of trade and geopolitics and how war and peace have been critical determinants of international trade over the very long run. The story they tell is sweeping in scope, one that links the emergence of the Western economies with economic and political developments throughout Eurasia centuries ago. Drawing extensively upon empirical evidence and informing their systematic analysis with insights from contemporary economic theory, Findlay and O'Rourke demonstrate the close interrelationships of trade and warfare, the mutual interdependence of the world's different regions, and the crucial role these

factors have played in explaining modern economic growth Power and Plenty is a must read for anyone seeking to understand the origins of today's international economy the forces that continue to shape it and the economic and political challenges confronting policymakers in the twenty first century

Mediterranean Paradiplomacies Manuel Duran, 2015-03-10 In Mediterranean Paradiplomacies The Dynamics of Diplomatic Reterritorialization Manuel Duran presents a new view on the phenomenon of paradiplomacy by analyzing the diplomatic activities of a number of Mediterranean substate entities as a site of political territorialization The international agency of these substate entities is giving way to new patterns of territorialization as well as alternative forms of diplomacy Duran examines the diplomatic activities of two Spanish two French and two Italian regions The book poses the question of why and how these regions operate diplomatically in a given territorial milieu and convincingly elucidates the particular patterns of reterritorialization that result from these diplomatic activities

Cities, Texts and Social Networks, 400-1500 Caroline Goodson, Anne E. Lester, Carol Symes, 2017-05-15 Cities Texts and Social Networks examines the experiences of urban life from late antiquity through the close of the fifteenth century in regions ranging from late Imperial Rome to Muslim Syria Iraq and al Andalus England the territories of medieval Francia Flanders the Low Countries Italy and Germany Together the volume's contributors move beyond attempts to define the city in purely legal economic or religious terms Instead they focus on modes of organisation representation and identity formation that shaped the ways urban spaces were called into being used and perceived Their interdisciplinary analyses place narrative and archival sources in communication with topography the built environment and evidence of sensory stimuli in order to capture sights sounds physical proximities and power structures Paying close attention to the delineation of public and private spaces and secular and sacred precincts each chapter explores the workings of power and urban discourse and their effects on the making of meaning The volume as a whole engages theoretical discussions of urban space its production consumption memory and meaning which too frequently misrepresent the evidence of the Middle Ages It argues that the construction and use of medieval urban spaces could foster the emergence of medieval public spheres that were fundamental components and by products of pre modern urban life The resulting collection contributes to longstanding debates among historians while tackling fundamental questions regarding medieval society and the ways it is understood today Many of these questions will resonate with scholars of postcolonial or non Western cultures whose sources and cities have been similarly marginalized in discussions of urban space and experience And because these essays reflect a considerable geographical temporal and methodological scope they model approaches to the study of urban history that will interest a wide range of readers

Kingship and Politics in the Late Ninth Century Simon MacLean, 2003-09-25

This is a major study of the collapse of the pan-European Carolingian empire and the reign of its last ruler Charles III the Fat 876-888 The later decades of the empire are conventionally seen as a dismal period of decline and fall scarred by internal feuding unfettered aristocratic ambition and Viking onslaught This book offers an alternative interpretation arguing that previous generations of historians misunderstood the nature and causes of the end of the empire and neglected many of the relatively numerous sources for this period Topics covered include the significance of aristocratic power political structures the possibilities and limits of kingship developments in royal ideology the struggle with the Vikings and the nature of regional political identities In proposing these explanations for the empire's disintegration the book has broader implications for our understanding of this formative period of European history more generally

Comparativism in Art History Jas Elsner, 2017-07-05

Featuring some of the major voices in the world of art history this volume explores the methodological aspects of comparison in the historiography of the discipline The chapters assess the strengths and weaknesses of comparative practice in the history of art and consider the larger issue of the place of comparative in how art history may develop in the future The contributors represent a comprehensive range of period and geographic command from antiquity to modernity from China and Islam to Europe from various forms of art history to archaeology anthropology and material culture studies Art history is less a single discipline than a series of divergent scholarly fields in very different historical geographic and cultural contexts but all with a visual emphasis on the close examination of objects These fields focus on different often incompatible temporal and cultural contexts yet nonetheless they regard themselves as one coherent discipline namely the history of art There are substantive problems in how the sub-fields within the broad brush generalization called art history can speak coherently to each other These are more urgent since the shift from an art history centered on the western tradition to one that is consciously global
