Greece, 1950-1963 Xenophon Zolōtas, Greco-Roman Lessons for Public Debt Management and Debt Market Development Alessandra Campanaro, Dimitri Vittas, 2004 *Stabilization policies in Greece in the context of modern macroeconomic theory* Karl Jürgen Numrich, Carl Walter Meyer, Kurt Nagel, Volbert Alexander, George D. Demopoulos, 2019 **The Post-War Reconstruction of Greece** George Politakis, 2017-10-16 The book presents the first comprehensive account of how economists engineers and industrialists mapped out the economic future of Greece in the aftermath of civil war devastation It documents the policy debate that took place among Greece and its sponsors about the future course of the economy the required investment and their financing Through historical narrative archival sources and oral history this book offers a better understanding of the achievements proclaimed by many economists as an economic miracle The Greek Military Dictatorship Othon Anastasakis, Katerina Lagos, 2021-09-17 From 1967 to 1974 the military junta ruling Greece attempted a dramatic reshaping of the nation implementing ideas and policies that left a lasting mark on both domestic affairs and international relations Bringing together leading scholars from a range of disciplines The Greek Military Dictatorship explores the junta s attempts to impose authoritarian rule upon a rapidly modernizing country while navigating a complex international landscape Focusing both on foreign relations as well as domestic matters such as economics ideology religion culture and education this book offers a fresh and well researched study of a key period in modern Greek history Europeanization and the Southern Periphery Kevin Featherstone, George Kazamias, 2014-05-12 Europeanization is a term increasingly used in the social sciences to describe the impact convergence or response of politicians and institutions in relation to the European Union This volume explores the concept in a variety of different settings in order to clarify its meaning **Greece and the Cold War** Alexander Kazamias, 2022-08-25 After the proclamation of the Truman Doctrine in 1947 the United States became deeply involved in Greek affairs By 1952 however the pro Western government of Marshal Papagos began to support the nationalist Enosis movement in Cyprus and called for an end to British colonial rule in the island The opposition of the US Britain and Turkey to these demands brought Greece face to face with its closest allies at the United Nations in 1954 and led to the outbreak of the first major crisis within NATO since its creation Greece and the Cold War examines these developments from the novel perspective of critical international theory and exposes the unexplored connections between dependence and nationalism in Greek foreign policy Drawing on a wide range of American British and Greek archival sources it argues that nationalism and compliance with the collective interests of NATO were two irreconcilable objectives in Greek foreign policy after 1952 At the same time the book tells the story of how the post Civil War governments of Greece for a variety of political cultural and ideological reasons treated these two objectives as essentially compatible resulting in the adoption of a dualist policy This self contradictory diplomatic doctrine which the author refers to as dependent nationalism lies at the heart of Greece s post War failures both to emancipate its politics from US intervention and to peacefully end its regional dispute with Turkey over Cyprus The book deploys an interdisciplinary approach which

brings together the diverse perspectives of diplomatic history foreign policy analysis and political sociology **Giving Credit to Dictatorship** Valerio Torreggiani, José Luís Cardoso, 2024-12-31 This edited volume explores the interplay between political economic and financial development in twentieth century European authoritarian regimes The book features case studies that explore the impact of domestic and international finance on the rise stabilization and decline of various European dictatorships of the twentieth century such as Italy Germany Yugoslavia Portugal Spain Greece and Turkey The chapters delve into the role that the regimes played in shaping and transforming the financial system exploring their international interconnections as well as the influence of economic theory and ideological constructs in dictatorial environments Applying the methodological framework of the history of capitalism to the analysis of the relationship between authoritarian regimes and financial systems the book provides new insights into the relationships between politics and economics and it offers a fresh perspective on contemporary political issues and their interaction with the global financial system This collection is an ideal resource for postgraduate students and researchers in history economics political economy and political sciences
