Communicable Crises Deborah E. Gibbons, 2007-03-01 This volume makes a significant contribution to the crisis management literature It also adds to our inchoate understanding of network governance temporary teams and task forces communities of practice alliances and virtual organizations It hints that the distinction between networks and organizations may be somewhat spurious a matter of degree rather than kind Indeed it seems that this distinction may derive more from mental models in which we consistently reify organizations than anything else Finally the volume emphasizes the functional importance of leadership in network governance and puzzles over its provision in the absence of hierarchy As such it adds to the contributions made by Marc Granovetter 1973 John Seeley Brown and Paul Duguid 1991 Bart Nooteboom 2000 Paul J DiMaggio 2001 John Arquilla and David Ronfeldt 2001 Laurence O Toole and Ken Meier 2004 and others as well as Nancy Roberts seminal work on wicked problems and hastily formed teams The result is a product the editor and the contributors can be proud of Overall it is one that will edify surprise and delight its readers

Regional Office for the Western Pacific,2006 The severe acute respiratory syndrome virus SARS first emerged in southern China in November 2002 and in the following months spread to 12 other countries in the Western Pacific region where 95 per cent of the global cases took place with devastating force By July 2004 when the epidemic was finally declared over it had killed nearly 800 people including many healthcare workers Although by some standards this first emerging and readily transmissible disease of the 21st century was not a big killer it caused more fear and social disruption than any other outbreak of our time Written largely by the public health experts and scientists involved in efforts to control the epidemic this publication examines the emergence and spread of SARS the public health measures taken to deal with it the epidemiology of the SARS coronavirus SAR CoV and vaccine development and its impact on people and economies in individual countries in the region and around the world **SARS, Governance and the Globalization of Disease** D. Fidler,2004-04-30 SARS Governance and the

Globalization of Disease provides a comprehensive and original analysis of the historic global SARS outbreak of 2003 David P Fidler constructs a political pathology of the SARS outbreak analyzes the government responses to it places these responses in historical context and assesses the implications of the successful management of the outbreak for handling future pathogenic threats that will arise The book includes a detailed description of the outbreak and governance responses to it as well as a focused analysis of China's role in the outbreak

At the Epicentre Christine Loh, 2004-01-01 What was really happening as Hong Kong struggled with SARS In *At the Epicentre* the story of those extraordinary weeks unfolds with all its drama personal national and international political medical and scientific The authors give us the whole picture from a day by day calendar of events to the experiences of a SARS sufferer from the heroic efforts of the medical staff in the hospitals to the work of the pioneering global network of laboratories that the World Health Organisation WHO created from the amazing shift to openness of the Chinese authorities to a detailed study of how the global media covered the story It is a story of individuals of Dr Gregory Cheng recounting how it felt to have SARS of the concentrated and intense work of Professor Malik Peiris as he struggled to identify the virus of Dr David Heyman of the WHO as he dealt with intense political pressures yet moved the international effort along at high speed The impact of SARS on Hong Kong was enormous and far reaching *At the Epicentre* explores the economic consequences the way the community responded and what might be the long term political implications for Hong Kong for China and for the international community The authors are rigorous but fair in their criticisms recognizing that what seems clear now was not always so in the heat of the battle But most important are the lessons they draw from the events and experiences for the next time for the authors all recognize that SARS is just the first global epidemic of the new century

Ebola Virus Disease Adnan I. Qureshi, 2016-01-09 *Ebola Virus Disease From Origins to Outbreak* covers Ebola virus disease in its entirety from its origins through major outbreaks in the past to the present day outbreak It contains information on the West Saharan response to Ebola as well as highlights from the field in West Africa from Dr Qureshi and Dr Chughtai helping to solve the primary question of what's next and aiding in formulating a path forward With a growing awareness of the devastating effects of this viral disease and an influx of topical research this book provides the information the global community of researchers clinicians and students need to better inform their research and study of Ebola virus disease Includes perspectives from the 2014 2015 outbreak from the field Provides a detailed overview of the origins of Ebola virus through present day discoveries Written with an integrative approach incorporating scientific research with insights from the field

Rhetoric of a Global Epidemic Huiling Ding, 2014-04-17 2016 CCCC Best Book Award in Technical and Scientific Communication In the past ten years we have seen great changes in the ways government organizations and media respond to and report on emerging global epidemics The first outbreak to garner such attention was SARS severe acute respiratory syndrome In *Rhetoric of a Global Epidemic* Huiling Ding uses SARS to explore how various cultures and communities made sense of the epidemic and communicated about it She also investigates the way

knowledge production and legitimation operate in global epidemics the roles that professionals and professional communicators as well as individual citizens play in the communication process points of contention within these processes and possible entry points for ethical and civic intervention Focusing on the rhetorical interactions among the World Health Organization the United States China and Canada *Rhetoric of a Global Epidemic* investigates official communication and community grassroots risk tactics employed during the SARS outbreak It consists of four historical cases which examine the transcultural risk communication about SARS in different geopolitical regions at different stages The first two cases deal with risk communication practices at the early stage of the SARS epidemic when it originated in southern China The last two cases move to transcultural rhetorical networks surrounding SARS With such threats as SARS avian flu and swine flu capturing the public imagination and prompting transnational public health preparedness efforts the need for a rhetoric of global epidemics has never been greater Government leaders public health officials health care professionals journalists and activists can learn how to more effectively craft and manage transcultural risk communication from Ding's examination of the complex and varied modes of communication around SARS In addition to offering a detailed case study *Rhetoric of a Global Epidemic* provides a critical methodology that professional communicators can use in their investigations of epidemics and details approaches to facilitating more open participatory risk communication at all levels

Negotiating And Navigating Global Health: Case Studies In Global Health Diplomacy Ellen Roskam, Ilona Kickbusch, 2011-12-28 Diplomacy is undergoing profound changes in the 21st century and global health is one of the areas where this is most apparent The negotiation processes that shape and manage the global policy environment for health are increasingly conducted not only between public health experts representing health ministries of nation states but include many other major players at the national level and in the global arena These include philanthropists and public private players As health moves beyond its purely technical realm to become an ever more critical element in foreign policy security policy and trade agreements new skills are needed to negotiate global regimes international agreements and treaties and to maintain relations with a wide range of actors The intent of this book is to provide learning tools for today's broad group of new health diplomats in the landscape of this ever shifting complex technical and political arena The case studies are told as the negotiations were experienced by individuals who participated in the various debates dialogues negotiations or by experts who have studied them This collection fills an important gap in both knowledge and practice providing insight on how negotiations on global health issues have transpired the successes challenges failures tools and frameworks for negotiation mechanisms of policy coherence ways to achieve global health objectives internationally and how global health diplomacy used as a foreign policy tool can improve relations between nations

Learning from SARS Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2004-04-26 The emergence of severe acute respiratory syndrome SARS in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it

had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.
