Improving a Country's Education Nuno Crato,2020-11-23 This open access book compares and contrasts the results of international student assessments in ten countries The OECD s Programme for International Student Assessment PISA released the results of its 2018 assessment in December 2019 This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries Such causes include continuous decline in one country improvement combined with increasing internal inequalities in another country or rapid improvement in spite of an outdated curriculum in yet another In addition the book discusses a number of general questions Is knowledge outdated Are computers taking over and replacing teachers Are schools killing creativity Are we adequately preparing the next generation Are schools failing to educate our kids The book starts out with a summary of PISA s evolution and PISA results and an explanation of the major factors that play a role in changes in countries results The next ten chapters are devoted to ten specific countries offering a summary of data and an explanation of the major drives for changes in education results for each one Each chapter includes a short description of the country s educational system as well as the impact of PISA and other ILSA studies on the country s educational policies The chapters also include a timeline of policy measures and main hallmarks of the country s educational evolution discussing the impact of these measures on its PISA results A final reference chapter explains what PISA is what it measures and how While highlighting the 2018 results the book also takes into consideration previous results as well as long term initiatives This book gathers the contribution of well known and respected

experts in the field Specialists such as Eric Hanushek for the US Tim Oates for England Montse Gomendio for Spain Gunda Tire for Estonia and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system *Resources in Education*, 2000-04 **L2 Writing Assessment** Elena Kkese, 2019-11-01 When severe reading and spelling problems are not detected at an early stage in the school context students may not be able to overcome them even in adulthood Such problems in the worst cases may lead to developmental dyslexia or developmental dysorthographia which are severe learning disabilities Early intervention though can prevent these problems Consequently involving students in an active writing programme and providing them with ample opportunities to use spelling words in frequent writing can be the answer to such an inquiry Meaningful writing can further facilitate spelling acquisition since in this manner they can gain control over their work and learn to focus on the writing process and not exclusively on the final product The book addresses these issues in order to help educators and clinicians identify such problems early while it also acts as a practical guide to instruction and assessment **The British National Bibliography** Arthur James Wells, 2006
