Mutated bugs are running amuck, forcing the noble bee Buck Bumble to exterminate his irradiated kin in this unique 3D third-person shooter. Naturally, the best way to thwart an insect invasion is pure annihilation. Buck flies through 19 stages of garden mayhem in an attempt to scorch everything clean. Unlike conventional aircraft, Buck the bee can hover in place and turn with precision, adding flexibility to his attacks. Flying is accomplished by holding A, while the C-buttons toggle weapons and zoom in the camera for pinpoint targeting. Evasive loop-de-loops are also available via a quick tap of L or R. Apart from the straightforward seek-and-destroy and courier missions that carry most stages. Players spend ample time exploring the various backyard and swampy landscapes for elusive items, hidden targets, and extra weapons. The 11 offered weapons are the greatest draw, providing numerous strategic and experimental options. Buck's initial laser pistol is rather useless. Still, the concussive multi-bomb is great for clearing ground targets and herds of incoming critters, the steerable missile launcher is perfect for tackling gigantic beetles and other armored foes from safe distances, while the lightning gun can cook a swarm of chasing wasps faster than the meanest bug zapper. Moreover, honey drops and "point particles" can be grabbed for added energy and extra lives, respectively. However, a proper lock-on mechanic is lacking, leading to some clumsy targeting that aggravates an already inconsistent difficulty. Multiplayer options are limited to a basic deathmatch and a quick mini-game, which do the experience no favors, alongside the repetitive environments and shallow draw distance. The audio is a different matter, boasting competent tracks and sound effects further redeemed by an amazingly catchy opening theme – an infectious silly musical ditty destined to outlast its original form of delivery. This song seems to promise a level of wacky fun that is never fully upheld, thus reducing this wannabee classical masterpiece to a bumbling, whispering tone.

Reflections: Remember Argonaut Software, the talented developer that designed the original *Star Fox*, one of the SNES' finest shooters? Why Nintendo didn't bring the team back for *Star Fox 64* is anyone's guess, but it does explain *Buck Bumble*, Argonaut's strange alternative. The result, presumably, should have been another exciting rail-based shooter, just one with bees instead of anthropomorphic critters. Unfortunately, the company copied *Star Fox 64*'s weaker, free-roaming levels instead, thus creating a slower-paced, meandering experience that lacks the sting of its source inspiration. All most remember about this game now is Buck's glorious theme song. – DA
