Tomlinson, 2018-03-13 The designers at Nikon in 2004 05 were looking for a way to reach the semi pro photographer The semi pro is someone who has another job but shoots photos often at weddings as a part time job They re sometimes called weekend warriors They tend to be serious and dedicated but they had no need for the pro digital single lens reflex behemoths like the Canon EOS 5D Mark II or the Nikon D5 What they needed then and now is a DSLR camera that is built strong is always reliable and can handle their workload That led to the first true semi pro camera from the company the Nikon D200 The D200 may have been overshadowed by its successor the Nikon D300 but it s still a great camera A great camera that can be had relatively cheaply and that makes it an even better camera

Tomlinson, 2018-03-16 The Nikon D70 was Nikon's third revolution just in the digital photography age Never mind the major one in 1959 with the Nikon F that changed professional film photography The first was the Nikon D1 started pro digital photography the end of mainstream film The second was the Nikon D100 the first DSLR to reach the lofty heights of 6.1 megapixels Then there was the D70 It looks and feels like a modern DSLR and Nikon released it in 2002 It was in its own way as revolutionary as the D1 and the D100 I've taken some of my best photos with it The thing is there really is little negative to say about the Nikon D70 D70S You can come up with many reasons to spend more money on a newer DSLR but if you want a great camera for little money the Nikon D70 or D70S is a good bet **David Busch's Nikon Z50 Guide to Digital**
