Speedlights & Speedlites Lou Jones, 2013-06-19 Canon Speedlites and Nikon Speedlights are small off-camera flashguns that can provide big results if you know how to use them properly. Acclaimed Boston photographers Lou Jones, Bob Keenan, and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide packed full of inspirational images and comprehensive diagrams of the lighting set-ups used to capture them. They are significantly more advanced, lighter, and considerably cheaper than a standard flashgun and have many advantages. They are small and cheap enough that a number can be carried in your kit, and they can be used in combination, triggered wirelessly. They use through-the-lens (TTL) metering, which allows you to use the in-camera LCD and histograms to calculate the required power, direction, rather than having to use a light meter or trial and error. They use proprietary dedicated technology from Canon and Nikon that means there are no compatibility issues. Getting the most out of them, however, remains a mystery; most photographers still just use their speedlights in the same way as a standard flashgun. This is where this book comes in.

The Flash Photography Field Guide Adam Duckworth, 2014-03-26 Shooting with any kind of flash, whether it's a simple light on your camera, a remotely triggered unit, or a complete studio setup, completely changes the photographic experience. No longer do you simply need to be aware of light; now you need to know how to shape it to your own ends. The Flash Photography Field Guide, small enough to be taken on the most arduous shoot, will show you exactly how to do this, whether you're shooting models in a studio, live sports events, or something as personal and special as your friend's wedding. This book covers the details of setting up and using modern TTL flash systems and the creative and technical choices you'll come across from syncing the flash with the camera to modifying the quality of the light.
