handbook has more than 90% new content reflecting the growth and dynamism of the field. Leading scholars including many international voices review major theories, developmental issues, and instructional approaches for students at all grade levels. Cognitive and sociocultural aspects of writing are explored in depth, as are assessment principles and methods. Issues in teaching students with disabilities, multilingual students, and culturally diverse students are addressed. The volume discusses innovative research methods and educational technologies and identifies key directions for future investigation. New to This Edition: Chapters on executive functions in writing; disciplinary writing in math, science, and social studies; the role of vocabulary in writing; and formative assessment. Chapters on source-based writing; source evaluation; and writing development and instruction for African American students. Chapters on sociocultural aspects of writing; from critical literacies to agency and identity; social justice issues; and more, plus an emphasis on integrating cognitive and sociocultural perspectives throughout.

Tapping into Unstructured Data William H. Inmon, Anthony Nesavich, 2007-12-11. The Definitive Guide to Unstructured Data Management and Analysis. From the World's Leading Information Management Expert. A wealth of invaluable information exists in unstructured textual form, but organizations have found it difficult or impossible to access and utilize it. This is changing rapidly; new approaches finally make it possible to glean useful knowledge from virtually any collection of unstructured data. William H. Inmon, the father of data warehousing, and Anthony Nesavich introduce the next data revolution: unstructured data management. Inmon and Nesavich cover all you need to know to make unstructured data work for your organization. You'll learn how to bring it into your existing structured data environment, leverage existing analytical infrastructure, and implement textual analytic processing technologies to solve new problems and uncover new opportunities. Inmon and Nesavich introduce breakthrough techniques covered in no other book, including the powerful role of textual integration, new ways to integrate textual data into data warehouses, and new SQL techniques for reading and analyzing text. They also present five chapter-length real-world case studies demonstrating unstructured data at work in medical research, insurance, chemical manufacturing, contracting, and beyond. This book will be indispensable to every business and technical professional trying to make sense of a large body of unstructured text: managers, database designers, data modelers, DBAs, researchers, and end users alike. Coverage includes: What unstructured data is and how it differs from structured data; First-generation technology for handling unstructured data, from search engines to ECM and its limitations; Integrating text so it can be analyzed with a common colloquial vocabulary; integration engines, ontologies, glossaries, and taxonomies; Processing semistructured data; uncovering patterns, words, identifiers, and conflicts; Novel processing opportunities that arise when text is freed from context; Architecture and unstructured data; Data Warehousing 2.0: Building unstructured relational databases and linking them to structured data; Visualizations and Self-Organizing Maps (SOMs) including Compudigm and Raptor solutions; Capturing knowledge from spreadsheet data and email; Implementing and managing metadata; data models; data quality; and more.
