Museums and Communities Viv Golding, Wayne Modest, 2013-08-15 This edited volume critically engages with contemporary scholarship on museums and their engagement with the communities they purport to serve and represent Foregrounding new curatorial strategies it addresses a significant gap in the available literature exploring some of the complex issues arising from recent approaches to collaboration between museums and their communities The book unpacks taken for granted notions such as scholarship community participation and collaboration which can gloss over the complexity of identities and lead to tokenistic claims of inclusion by museums Over sixteen chapters well respected authors from the US Australia and Europe offer a timely critique to address what happens when museums put community minded principles into practice challenging readers to move beyond shallow notions of political correctness that ignore vital difference in this contested field Contributors address a wide range of key issues asking pertinent questions such as how museums negotiate the complexities of integrating collaboration when the target community is a living fluid changeable mass of people with their own agendas and agency When is engagement real as opposed to symbolic who benefits from and who drives initiatives What particular challenges and benefits do artist collaborations bring Recognising the multiple perspectives of community participants is one thing but how can museums incorporate this successfully into exhibition practice Students of museum and cultural studies practitioners and everyone who cares about museums around the world will find this volume essential reading **Communities and Museums in the 21st Century** Karen Brown, Alissandra Cummins, Ana S. González Rueda, 2023-08-18 *Communities and Museums in the 21st Century* brings together innovative multidisciplinary perspectives

on contemporary museology and participatory museum practice that contribute to wider debates on museum communities heritage and sustainability Set within the context of globalisation and decolonisation this book draws upon bi regional research that will enrich our understanding of the complex relationships between Europe Latin America and the Caribbean through museum studies and practice Chapters reflect upon the role of museums in defining community identities the importance of young people s participation and intergenerational work for sustainability the role of museums in local development and community based museums and climate change Contributors examine these issues through the lens of museum partnerships and practices as well as testing the continued relevance of the notion of integral museum and its relatives in the form of ecomuseums With its focus on regional museums in Latin America and Caribbean this book highlights how the case studies promote greater intercultural dialogue global understanding and social cohesion It also demonstrates how the methodology can be adapted to other communities who are facing the perils of climate change and unsustainable forms of development Communities and Museums in the 21st Century proposes creative and sustainable strategies relevant to a globalised future With its focus on global societal challenges this book will appeal to museologists and museum practitioners as well as those working in heritage studies cultural studies memory studies art history gender studies and sustainable development The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons CC BY NC ND 4.0 license

Museums and Source Communities Alison K. Brown, Laura Peers, 2005-06-28 This volume combines some of the most influential published research in this emerging field with newly commissioned essays on the issues problems and lessons involved in collaborating museums and source communities Focusing on museums in the UK North America and the Pacific the book highlights three areas which demonstrate the new developments most clearly the museum as field site or contact zone a place which source community members enter for purposes of consultation and collaboration visual repatriation the use of photography to return images of ancestors historical moments and material heritage to source communities exhibition case studies these are discussed to reveal the implications of cross cultural and collaborative research for museums and how such projects have challenged established attitudes and practices As the first overview of its kind this collection will be essential reading for museum staff working with source communities for community members involved with museum programmes and for students and academics in museum studies and social anthropology

Museums in Motion Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition interpretation engagement and service Section III examines

museums from within by exploring critical issues and contemporary movements facing museums and our society
 transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability
 and empathy Advocating for change rather than death to museums Museums in Motion demonstrates the very premise that
 museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb
 to something much more complex by deeply considering where museums have come from where they are today and where
 they are going Entirely new to this edition Section III Museum Aspirations features five new chapters each centered around
 topics rather than a museum type or museum function Each topic is meant to be a micro narrative and springboard for a
 conversation about museums today and their sustainability in the future The chapters examine museums from the inside
 museum workers and their voices especially as well as power held by people and institutions and DEIA without using those
 individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book
 these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to
 institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize

 Transforming Practice a comprehensive collection of articles from Museum Education Roundtable's Journal of Museum
 Education presents a rich and exemplary selection of writing in one accessible resource Each of the book's four sections
 includes an introductory essay sparks excerpted from each article that alone might ignite debate reflections by some of the
 authors looking back on their work and discussion questions Four case studies in the final section highlight the fascinating
 interplay among change response and understanding Transforming Practice is a professional development tool a resource for
 museum training programs small museums staffs practitioner groups and friends to inspire conversation critique debate and
 your own writing As Stephen E Weil writes in his foreword this book reveals the richness of ideas the dedication to
 excellence and the extraordinary depth and variety of talents to be found among this generation of museum educators

Pennay,2020-12-15 Museums have long sought to maintain relevance in the daily lives of their communities Over the past several decades museums have shifted as a field from a focus on collections to a focus on connecting with audiences More recently museums must confront political polarization and a decreasing sense of trust in nearly every public institution As a result few institutions are better positioned to serve the country than museums In fact polls show that museums rank among the most trusted institutions in the country regardless of political belief During tumultuous times this trust means that museums have a unique and important responsibility to fulfill their civic mission A century ago John Cotton Dana argued that the most important thing a museum can do is produce a public benefit The Civic Mission of Museums argues that museums play an essential role in the cultivation of engaged and informed citizens The book outlines a spectrum of civic learning that includes civic knowledge civic mindset civic skillset and civic action It offers concrete examples of impactful civic programming exhibits and public engagement from a diverse set of museums It ends with a practical toolkit gleaned from across the country for museum professionals to utilize Rural Museums and Their Communities Lydia Johnson,2000

The Museum Accessibility Spectrum Alison F. Eardley,Vanessa E. Jones,2025-01-16 The Museum Accessibility Spectrum engages with discussions around access to museums and argues that what is impairing the progress of museums towards inclusion is the current ableist model of access Drawing on contributors from international museum researchers practitioners artists and activists this volume challenges the notion of the core able museum visitor and instead proposes all individuals are positioned on a multidimensional Accessibility Spectrum which incorporates intersecting physical sensory neurodivergent and social and cultural dimensions It explores the ways in which access provisions designed to enhance the experience of a minority can enhance the museum experience for all visitors A constructively critical approach is taken to practice based chapters using case studies and approaches from around the globe split into three main sections Within the Disability Gain section the authors consider the benefits of inclusive design perspectives and practice for all visitors to the museum sector The Social and Cultural Inclusion section examines ways in which museums have broadened representation and participation to better serve audiences who have been excluded or underrepresented by the museums Finally the Agents of Social Change section considers how with this work museums are challenging systemic biases and exclusions The international cross disciplinary contributions in this volume are driven by research informed practice and will transform existing thinking to change future practice within the museum sector by challenging this ableist bias This book will be of interest and importance not only to museum practitioners and researchers but also to readers with an interest in cultural studies critical disability studies translation studies and inclusive and universal design The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Museums and Communities** Ivan Karp,Christine Mullen Kreamer,Steven Lavine,1992 Papers presented at a conference at the Smithsonian Institution International Center March 21-23 1990

Museums and the Paradox of Change Robert R. Janes, 2013-05-29 Museums throughout the world are under increasing pressure in the wake of the 2008 2009 economic recession and the many pressing social and environmental issues that are assuming priority The major focus of concern in the global museum community is the sustainability of museums in light of these pressures not to mention falling attendance and the challenges of the digital world *Museums and the Paradox of Change* provides a detailed account of how a major Canadian museum suffered a 40 percent loss in its operating budget and went on to become the most financially self sufficient of the ten largest museums in Canada This book is the most detailed case study of its kind and is indispensable for students and practitioners alike It is also the most incisive published account of organizational change within a museum in part because it is honest open and reflexive Janes is the first to bring perspectives drawn from complexity science into the discussion of organizational change in museums and he introduces the key concepts of complexity uncertainty nonlinearity emergence chaos and paradox This revised and expanded third edition also includes new writing on strengthening museum management as well as reflections on new opportunities and hazards for museums It concludes with six ethical responsibilities for museum leaders and managers to consider Janes provides pragmatic solutions grounded in a theoretical context and highlights important issues in the management of museums that cannot be ignored

The Economic Impact of Museums on Their Communities Joy Leach, Jay S. Stewart, 1984 *Manual for Small Museums* Laurence Vail Coleman, 1927 *The Journal of Museum Education*, 2003 **Museums and the Public Sphere** Jennifer Barrett, 2011-06-24 *Museums and the Public Sphere* investigates the role of museums around the world as sites of democratic public space Explores the role of museums around the world as sites of public discourse and democracy Examines the changing idea of the museum in relation to other public sites and spaces including community cultural centers public halls and the internet Offers a sophisticated portrait of the public and how it is realized invoked and understood in the museum context Offers relevant case studies and discussions of how museums can engage with their publics in more complex productive ways **The Routledge Handbook of Memory Activism** Yifat Gutman, Jenny Wüstenberg, 2023-02-15 This Handbook is the first systematic effort to map the fast growing phenomenon of memory activism and to delineate a new field of research that lies at the intersection of memory and social movement studies From Charlottesville to Cape Town from Santiago to Sydney we have recently witnessed protesters demanding that symbols of racist or colonial pasts be dismantled and that we talk about histories that have long been silenced But such events are only the most visible instances of grassroots efforts to influence the meaning of the past in the present Made up of more than 80 chapters that encapsulate the rich diversity of scholarship and practice of memory activism by assembling different disciplinary traditions methodological approaches and empirical evidence from across the globe this Handbook establishes important questions and their theoretical implications arising from the social political and economic reality of memory activism Memory activism is multifaceted takes place in a variety of settings and has diverse outcomes but it is always crucial to understanding the

constitution and transformation of our societies past and present This volume will serve as a guide and establish new analytic frameworks for scholars students policymakers journalists and activists alike *Museum Practices and the Posthumanities* Fiona R. Cameron, 2023-10-24 This book critiques modern museologies and curatorial practices that have been complicit in emerging existential crises It confidently presents novel more than human curatorial visions methods frameworks policies and museologies radically refiguring the epistemological foundations of curatorial museological thinking and practice for a habitable planet Modern curatorial and museological practices are dominated by modern humanism in which capital growth social technological advancement hubris extraction species logics and colonial domination predominate often without reflection While history science and technology museums and their engagement with non human worlds have always been ecological as an empirical reality the human centred frameworks and forms of human agency that institutions deploy tend to be non cognizant of this reality *Museum Practices and the Posthumanities* Curating for Planetary Habitability reveals how these practices are ill equipped to deal with the contemporary world of rapid digital transformations post Covid living climate change and its impacts among other societal changes and it shows how museums might best meet these challenges by thinking with and in more than human worlds This book is aimed at museological scholars and museum professionals and it will provide them with the inspiration to conduct research on and curate from a different ecological reference point to promote a world good enough for all things to thrive in radical co existence
