Oncoplastic Breast Surgery Florian Fitzal, Peter Schrenk, 2010-05-06 The initial idea to write a book on oncoplastic techniques was raised through a meeting on breast cancer treatment in Saalfelden A tria two years ago Contrary to the rather minor role breast surgery is conceded today compared to other treatment modalities the surgeons role on the further outcome of the disease is crucial and never compensated by radiation or adjuvant therapy Whereas surgery a decade ago was merely excision of the cancer and closure of the wound leaving behind a mutilated breast in many women the advent of oncoplastic surgery completely

changed the modern surgical approach to breast cancer. The concept of oncoplastic breast surgery combines oncologic resection either breast conservation or mastectomy with traditional or less traditional plastic surgical techniques. The primary goal is to achieve an optimal cosmetic result with long time local tumor control. Some non randomized studies available in patients following breast conservation oncoplastic surgery showed tumor resection to be associated with wider free margins, less patients needing reoperation surgery for involved or close margins, a widening of the indications for breast conservation surgery, a low complication rate and at least an equal local recurrence rate. There is no doubt that oncoplastic breast surgery experienced a rapid rise with more patients demanding this kind of surgery. However, a profound knowledge of the different oncoplastic techniques is essential for the outcome. *Oncoplastic Surgery of the Breast* Maurice Y. Nahabedian, 2019-10-24.
