## **One Breath Freediving Death And The Quest To Shatter Human Limits:**

*One Breath* Adam Skolnick, 2016-01-12 *One Breath* is a gripping and powerful exploration of the strange and fascinating sport of freediving and of the tragic untimely death of America's greatest freediver. Competitive freediving, a sport built on diving as deep as possible on a single breath, tests the limits of human ability in the most hostile environment on earth. The unique and eclectic breed of individuals who freedive at the highest level regularly dive hundreds of feet below the ocean's surface, reaching such depths that their organs compress, light disappears, and one mistake could kill them. Even among freedivers, few have ever gone as deep as Nicholas Mevoli. A handsome young American with an unmatched talent for the sport, Nick was among freediving's brightest stars. He was also an extraordinary individual, one who rebelled against the vapid and commoditized society around him by relentlessly questing for something more meaningful and authentic, whatever the risks. So when Nick Mevoli arrived at Vertical Blue in 2013, the world's premier freediving competition, he was widely expected to challenge records and continue his meteoric rise to stardom. Instead, before the end of that fateful competition, Nick Mevoli had died, a victim of the sport that had made him a star, and the very future of free diving was called into question. With unparalleled access and masterfully crafted prose, *One Breath* tells his unforgettable story and of the sport which shaped and ultimately destroyed him.

Mevoli Nick byl v jímě mladý a přirozený talent, byl jediný, kdo měl v tehdy mnoha rekordy. A z sluhou svého atraktivního vzhledu a mladosti se navíc stal i hvězdou. **Oxygen** William Trubridge, 2017-11-22. The incredible underwater world of William Trubridge. A memoir of an aquatic affinity, the power of the subconscious mind, and testing the limits of human physiology. William Trubridge spent his childhood on a sailing boat, waking to the sound of the sea. He set off for New Zealand from the UK with his family as an 18-month-old, spending the next ten years with the ocean as his school and his playground. He suffered a great deal of mental turmoil when eventually his family arrived in Hawke's Bay, where he had to stay on land to attend high school. Not long after finishing, William set off for the Bahamas to learn the art of freediving, a form of breath-hold diving without assistance. He's still there today, where he trains and teaches at Dean's Blue Hole, the deepest sea water sink hole in the world. Described as the greatest freediver of them all, William Trubridge is a 16-times world freediving record holder. He broke his own world record at Dean's Blue Hole in 2016, a dive he described as terrible; he feared he was going to black out before he reached the surface. In a sport where there are between 40 and 60 fatal accidents every year, it's not surprising William has had his fair share of close calls, one of which took from him his sense of taste. Freediving is one of the oldest and most intriguing relationships humans have with the ocean. It requires building a tolerance to oxygen deprivation and the feeling of suffocation, coping with immense water column pressure, increasing lung capacity by expanding diaphragm muscles, and stretching areas of the body seldom used. William has studied the techniques of sea mammals to test the limits of human physiology, and his experiments make for incredibly gripping reading. But this is not just a book about freediving; it is a book about one man's wonderment with the ocean, its creatures, and ecology. Exquisitely written, the book is a meditation on life and death, risk and mental toughness, dharma and discipline. There are also strong messages on overcoming life's adversity, whatever that may be, and how almost everyone's greatest adversary is actually, in the end, one's self.

**Last Breath** Peter Stark, 2002-02-05. Sudden extreme deaths have always fascinated us, and now more than ever, as athletes and travelers rise to the challenges of high-risk sports and journeys on the edge. In this spellbinding book, veteran travel and outdoor sports writer Peter Stark reenacts the dramas of what happens inside our bodies, our minds, and our souls when we push ourselves to the absolute limits of human endurance. Combining the adrenaline high of extreme sports with the startling facts of physiological reality, Stark narrates a series of outdoor adventure stories in which thrill can cross the line to mortal peril. Each death or brush with

death is at once a suspense story a cautionary tale and a medical thriller Stark describes in unforgettable detail exactly what goes through the mind of a cross country skier as his body temperature plummets apathy at ninety one degrees stupor at ninety He puts us inside the body of a doomed kayaker tumbling helplessly underwater for two minutes five minutes ten minutes He conjures up the physiology of a snowboarder frantically trying not to panic as he consumes the tiny pocket of air trapped around his face under thousands of pounds of snow These are among the dire situations that Stark transforms into harrowing accounts of how our bodies react to trauma how reflexes and instinct compel us to fight back and how why and when we let go of our will to live In an increasingly tamed and homogenized world risk is not only a means of escape but a path to spirituality As Peter Stark writes You must try to understand death intimately and prepare yourself for death in order to live a full and satisfying life In this fascinating informative book Stark reveals exactly what we re getting ourselves into when we choose to live and die at the extremes of endurance **Oxygen (16pt Large Print Edition)** William
