Schram,2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism's preference for market based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of *New Political Science* The College Buzz Book Carolyn C. Bulletin ... Lombard College, 1928 **How to Fulfil the UN Sustainability Goals** Felix Fuders, 2023-10-11 This book combines the field of economics especially monetary theory with other disciplines like ecology physics humanities social sciences and development theory This transdisciplinary approach makes the book a unique contribution for researchers students policy makers and professionals working in governmental or nongovernmental institutions as well as anyone interested in society s well being and achieving a true social ecological transformation It is written in an accessible language in order to reach a broad audience In 2015 more than 190 world leaders recognized that the world is on a collision course Max Neef and committed to 17 Sustainable Development Goals SDGs Many conferences and high level meetings have been held since then and one of the most frequently discussed topics is how to finance these goals There is a widespread belief that coming up with more money for sustainable development will do the trick Usually the discussions focus on finding additional financial resources in order to achieve the goals faster In this book it is argued that not only is more money needed but it needs to be a different kind of money The book demonstrates that ALL but one of the SDGs are directly linked to our monetary system which being completely unnatural can be seen as the most important but at the same time least recognized reason for market failure Many people think we just need to do more faster better Very few say that we have done things fundamentally wrong and that the institutions and values which motivated us to do those things need to be changed It will be concluded that only if we change our unnatural design of money to a more natural one will we be able to reach these goals
