*A Ten-Minute Approach to Educational Leadership* Robert Palestini, 2013-09-19 Educational leaders and aspiring leaders are constantly searching for ways to improve the functioning of their institutions This book provides them with a unique approach to diagnosing a school school system or college s organizational health and determining what interventions might be necessary to improve their operations Each chapter of the book is dedicated to one of the ten essential components of an organization like a school school system or university Most of the content of each chapter focuses on the implementation of these components but there is some emphasis on the supporting theory that speaks to why these leadership practices actually work We know that administrators are busy people therefore at the end of each chapter there is a Diagnostic Checklist of questions that should be helpful in quickly assessing the status of these components in an institution and indicating whether they need to be addressed In the Appendix there are two diagnostic instruments Heart Smart surveys I and II that will help in quantifying the assessment process so that the weaknesses can be easily identified and quickly corrected

This book takes a pedagogical approach that is participative and interactive involving the case study method of learning. Chapters start with an Indian case study of a well known company. This is used as a capstone case for the chapter. The student will find this an easy learning experience as data and additional information for these enterprises is readily available. The selection of such cases makes classroom learning truly suited to the Indian business environment. The value driven approach to Operations Management is used in structuring the text into three modules. The first module discusses the infrastructure function of Operations Management. Infrastructure function is considered to be product process capacity and location. Module Two describes the structure of the operations function. This includes quality and other product transformation processes. Module Three focuses on the organization people and processes i.e. the job the work and the workplace. In addition most of the mathematical techniques have been separated into supplements attached to the relevant chapters. Software solutions for the techniques have been explained in the text. Every mathematical technique is exemplified with a number of solved problems. Unlike many Production and Operations Management texts this book covers E commerce, Industrial Safety, Maintenance, Environmental Management, Green Productivity and new technological trends in the discipline. These sections should add to the significance of exploring how firms can gain competitive advantage and promote sustainable development at the same time. The last section of the book comprises of a selection of cases from The Indian Institute of Management at Ahmedabad. The cases encompass the entire spectrum of Indian Industry: the private and the public sectors, professional and family managed business organizations, service and manufacturing industries, single industry and conglomerates. The cases relate to Operations Strategy, Supply Chain Management, Capacity Planning, New Products, Manufacturing Technologies etc. The Case Studies are of world class. Prof Tirupati, one of the authors of the case studies according to Management Science, has penned one of the top 100 management articles in the 50 years. The book is comprehensive, lucid and easy to read and understand. It should be of great value both to students and faculty.

Alter, 1901 This 240 page workbook is a highly effective no nonsense self marketing instrument to facilitate and manage the entire job search campaign Contained in its pages are all the tools and information necessary to help your terminated employee win and keep their next job Whether or not you provide Outplacement support to your separated employees our workbook would be an excellent tool to augment their job search It provides a complete resource to help the discharged worker achieve and keep their next position FINDING A JOB IS HARD WORK It has been estimated that as many as one out of every three workers attempts to change jobs annually in the United States Out of a labor force of 153 million that represents almost 50 000 000 job seekers who are seeking new employment each year As a result the job search process is highly competitive at all levels It can be lengthy frustrating prejudicial and unfair Older more traditional job finding techniques have become less productive The traditional resume no longer has the same impact in generating the all important and often elusive interview Both the Wall Street Journal and USA TODAY have highlighted the fact that only about 15% of all professionals find a new position through responding to published advertisements or online postings another 10% through placement agencies or search firms and only 5% through unsolicited direct mail Why then would anyone focus 90% of their time and effort in areas that represent only about 30% of all potential opportunities It is not uncommon for 200 300 people to respond to help wanted advertisements Yet seldom do more than 6 to 10 people achieve interviews and after an often lengthy process only one person gets the job Everyone else starts the whole process again Older Americans women and minorities can often face an even more difficult road due to unspoken but ever present biases There is a better way Tomorrow Is Today dispels the myth that the most qualified candidate always gets the job It points out that the person who is hired is usually the one who is liked the best This book can be a major factor in how you differentiate yourself from other candidates when the hiring decision is almost always based upon subjective factors such as the individual s personality style body language and manner of being interviewed It is an invaluable resource in helping you to achieve your next position with added features that assist in effectively managing both career growth and family issues Economical and Technical Considerations for Solar Tracking: Methodologies and Opportunities for Energy Management Soulayman, S., 2017-09-13 Renewable energy is a critical topic of discussion in contemporary society With increased attention on alternative methods solar tracking has emerged as an
