

TX-SR608 7.2-Channel Home Cinema Receiver

CLASS D

Hitting the Sweet Spot Where Budget and Performance Meet

Sure, we call it an "entry-level" A/V receiver. But when you witness the full potential of the TX-SR608, you'll know the level you're entering is far beyond the ordinary. For a start, you get six of the latest HDMI® 1.4a inputs for simple hook-up of all your high-def sources. HDMI 1.4a also brings compatibility with the new 3D video format, as well as an Audio Return Channel from your display back to the receiver. Complementing HDMI as the input front, you have an analog RGB video input for connecting your PC, and a Universal Port for CD/DVD peripherals. All video sources, regardless of resolution, can be upgraded to big and beautiful 1080p via HDMI and Parasola DCDi Cinema™. Audio processing incorporates quality Burr-Brown DACs, lossless Dolby and DTS coders, and the expanded surround formats of Audyssey DSX™ and Dolby® Pro Logic® IIx. Three-stage inverted Darlington circuitry and peerless technology work to ensure extremely precise and faithful amplification. In recognition of the TX-SR608's outstanding A/V prowess, it has been awarded THX® Select2 Plus™ Certification.

HDMI® 1.4a Support for 3D Video and Audio Return Channel

Two via HDMI 1.4a inputs on the TX-SR608 let you simultaneously connect high-def sources such as a Blu-ray player, a gaming console, and a cable/satellite tuner. A single output then sends a primal signal to your connected high-resolution display. As the latest version of the connected HDMI 1.4a adds the exciting possibilities of 3D video and an Audio Return Channel, 3D video is the next big thing in home entertainment, with movies, games, and broadcast content on the move with 3D capabilities. This set the new frontier. The TX-SR608 also offers the convenience of an Audio Return Channel via HDMI. Audio content received directly by your HDMI's tuner can be sent "upstream" to your A/V receiver without the need for a separate optical audio cable.

HDMI® Video Upgrading to 1080p with Parasola DCDi Cinema™

When it comes to video processing, the Parasola DCDi Cinema (Deconvolution/Correlation/Dematrixing) video processor offers several advantages. This processor can accept any video signal regardless of the source resolution, and upscale it to 1080p to match the native resolution of your high-definition display. In fact, more DCDi Cinema effectively removes video artifacts such as jagged edges during the video signal dematrixing process. This get to single smooth progressions over video images, even for fast-moving sports and action scenes.

Audyssey DSX™ and Dolby® Pro Logic® IIx Add New Dimensions to Surround Sound

The TX-SR608 handles two new surround-sound technologies from Audyssey and Dolby that offer exciting new ways to set up the speakers in your home cinema system. Audyssey DSX lets you incorporate "front center" speakers in place of the usual surround-sound speakers to expand the width of the soundstage. Set up at a recommended 90° off-center, these channels help to produce a more realistic soundstage and a more intimate listening experience. Alternatively, Audyssey DSX can encourage the 12 standard surround-sound channels to deliver three "true" channels. These channels carry ambient, non-directional audio that adds a new vertical dimension to your music and games. Dolby Pro Logic IIx provides a wider front-right speaker option that allows users to create a more engaging home cinema experience.

THX® Select2 Plus™ Certified

This Select2 Plus certification is specified for rooms where the recommended listening distance is 8 to 14 meters, and the room volume is around 30 cubic meters. To achieve THX Select2 Plus certification, the TX-SR608 must meet the world's most demanding standards for music, cinema, audio quality, and performance, and must play at reference volume levels with minimal distortion.
