Trebilcock, 2021-05-28 In this thoroughly revised and updated second edition Mariana Mota Prado and Michael J Trebilcock offer a succinct and readable introduction to the main concepts and debates in the field of law and development They examine the role of legal systems and institutions investigate perceptions around what laws and legal arrangements encourage and facilitate development and probe the issues arising in both private law and public law as well as in international economic relations Written with the insight of two top experts in the field this Advanced Introduction covers the most recent trends in law and development research and highlights areas that remain underexplored

A World of Inequalities Lucinda Mosher, 2021-02-16 In this volume leading Christian and Muslim scholars respond to the global crisis of inequality by demanding and modeling interreligious dialogue Essays explore the roots of these realities how they are treated in Christian and Muslim traditions and texts and how the two faiths can work together to address inequality

Law in a Changing World Jutta Brunnee, Brenda Cossman, Andrew Green, Benjamin Alarie, 2025-05-31 Law in a Changing World explores how climate change is reshaping the law drawing on contributions from legal scholars across diverse fields The book examines how climate change impacts areas such as governance justice housing and disability law Rather than focusing on climate law alone the chapters explore how climate change is challenging foundational legal concepts and demanding adaptations across various sectors The authors consider the roles of international Indigenous and domestic legal systems in addressing climate related issues Topics include climate justice for vulnerable populations the role of government in crisis management and the intersection of law with emerging challenges like housing and disability rights Law in a Changing World provides a comprehensive cross disciplinary examination of how legal frameworks can respond to climate related emergencies and injustices offering fresh perspectives on the role of law in a warming world It is an essential read for those interested in the intersection of law policy and climate change

Global Problems, Global Solutions JoAnn Chirico, 2024-03-08 A global look at social problems using the UN s 2030 Agenda for Sustainable Development as a framework

Unreason Kendrick Frazier, Benjamin Radford, 2023-10-17 UNREASON Exploring Pseudoscience Conspiracies and Extraordinary Claims is a collection of forty five of the best articles the legendary Skeptical Inquirer magazine has published in the past decade Featuring articles from writers including Neil

deGrasse Tyson on the process of science Richard Dawkins on the standards of truth Elizabeth Loftus on memory Steven Pinker on the notion of progress and many others covering topics from the politicization of science to the frightening rise of misinformation each entry in this collection brings scientific examination to bear in order to ferret out the facts and misconceptions behind popular claims All of the articles within are interesting and readable Yet they are also quite diverse Some articles reinforce and complement each other others as happens in science may voice disagreements or differing perspectives But they all have one thing in common a respect for evidence a demand for the best most well tested most scientifically reliable information Readers will learn Why and how conspiracy rumors start spread and readily gain believers How to stay afloat in a sea of disinformation and survive the age of misinformation Why and how we form beliefs and adhere to them so powerfully How and why memory is fallible and what we can do about it How pseudoexperiments mislead the public about science Unreason will arm readers with scientific knowledge to curb the misinformation and misconceptions that increasingly threaten our civil discourse Even further these essays present a way for us to be better citizens equipped to deal with the winds of misinformation and disinformation swirling about us and better able to look ahead to a world where science and reason indeed just good old common sense can prevail

Development Theory and Practice in a Changing World Pádraig Carmody, 2019-04-09 Taking a critical and historical view this text explores the theory and changing practice of international development It provides an overview of how the field has evolved and the concrete impacts of this on the ground on the lives of people in the Global South Development Theory and Practice in a Changing World covers the major theories of development such as modernisation and dependency in addition to anti development theories such as post modernism and decoloniality It examines the changing nature of immanent structural conditions of development in addition to the main attempts to steer them imminent development The book suggests that the era of development as a hegemonic idea and practice may be coming to an end at the same time as it appears to have achieved its apogee in the Sustainable Development Goals as a result of the rise of ultra nationalism around the world the increasing importance of securitisation and the existential threat posed by climate change Whether development can or should survive as a concept is interrogated in the book This book offers a fresh and updated take on the past 60 years of development and is essential reading for advanced undergraduate students in areas of development geography international studies political science economics and sociology

The Three Axial Ages John Torpey, 2017-03-01 How should we think about the shape of human history since the birth of cities and where are we headed Sociologist and historian John Torpey proposes that the Axial Age of the first millennium BCE when some of the world's major religious and intellectual developments first emerged was only one of three such decisive periods that can be used to directly affect present social problems from economic inequality to ecological destruction Torpey's argument advances the idea that there are in fact three Axial Ages instead of one original Axial Age and several subsequent smaller developments Each of the three ages contributed decisively to how humanity lives and the

difficulties it faces The earliest or original Axial Age was a moral one the second was material and revolved around the creation and use of physical objects and the third is chiefly mental and focused on the technological While there are profound risks and challenges Torpey shows how a worldview that combines the strengths of all three ages has the potential to usher in a period of exceptional human freedom and possibility

The theory of the kingdom: A unified model of human agency Andrew Root, 2024-01-02 This original monograph presents a comprehensive theory regarding the economy of the kingdom of God The theory and associated model will help individuals make better choices The research integrates fundamentals of the temporal real economy and the permanent economy of the kingdom of God to present a unified model of human agency According to the model effective agents are salt and light in the real economy arresting corruption and revealing the truth Effective agency produces life peace and growth Individual and organizational practices that arrest corruption and reveal truth can resolve longstanding economic grievances The list of spiritual credence goods is extensive and includes commonly known virtues such as humility patience and hope Spiritual goods are allocated based on the owner agent relationship The quantity of goods the owner supplies is in proportion to an individual's sacrificial offering of time and money Spiritual goods are stored as heart capital In a process analogous to the real economy heart labor applied to heart capital produces desirable outputs The owner relates to his agents through a heart inscribed behavioral contract The owner generally intervenes in the real economy by communicating with agents rather than by restricting choice Prior studies across economics finance and sociology prove the efficiency of behavioral contracts and communication over restricted choice Herein researchers will find new testable propositions and practitioners will find new ideas and practices to live better more consequential lives Examples of practical applications include methods of resolving group level bias and understanding the purpose of life's difficulties

Colonialism, Independence, and the Construction of Nation-States Forrest D. Colburn, 2020-09-29 This book investigates studies on colonialism and anti colonialism from Africa the Middle East Asia and Latin America The author begins by recounting the deleterious impact of colonialism and then focuses on the heady days of anti colonialism nationalism He traces how the system fell apart leaders especially those of the second generation often turned out to be inept and corrupt structural obstacles led poor countries to continue to depend on the export of commodities advanced countries promised to help but did not prove useful when growth was possible here and there the fruits of development were seldom distributed widely This project will appeal to the academics researchers and students in the fields of comparative politics development studies government and economics

Making Russia and Turkey Great Again? Norman A. Graham, Folke Lindahl, Timur Kocaoglu, 2021-03-19 This study analyzes theoretically and empirically the background of the rise to power of Vladimir Putin in Russia and Recep Tayyip Erdogan in Turkey It situates this analysis in the contexts of the historical assessment of the fragility of liberal democracy and the persistence and growth of authoritarianism populism and dictatorship in many parts of the world The authors argue that the question whether Putin

and Erdogan can make Russia and Turkey great again is hard to confirm personal ambition for power and wealth is certainly key to an understanding of both rulers They each squandered opportunities to build from free and fair democratic electoral legitimacy and economic progress The prospect for restored national greatness depends on how they can handle the economic and political challenges they now face and will continue to face in the near future in a climate of global pandemic and economic recession Both rulers so far have succeeded in maintaining and increasing their powers and influence in their respective regions but neither has made real contributions to regional stability and order Chaos seems to be growing and the EU and the U S thus far seem unable to provide coherent responses to mitigate the impact of their adventurism and disruption

Handbook of Aid and Development Raj M. Desai, Shantayanan Devarajan, Jennifer L. Tobin, 2024-06-05 With intellectual rigour the Handbook of Aid and Development not only critically examines the relationship between aid and development but also discusses recent trends within the field and judiciously considers its future prospects **Populist**

Nationalism in Europe and the Americas Fernando López-Alves, Diane E. Johnson, 2018-10-10 Populist nationalism fuses beliefs that citizens are being exploited by a privileged elite with claims that the national culture and interests are under threat from enemies within or without Ideologically fluid populist nationalists decry out of touch institutions such as political parties and the mainstream press while extolling the virtues of the people They claim that only populists can truly represent the nation and solve its problems and often call for unorthodox solutions that appeal to the common people The recent spread of populist nationalism throughout the world has triggered a growing interest in the subject led mainly by journalists The Brexit vote and the election of Donald Trump in the US have provoked a flurry of media coverage in Europe and the Americas along with parliamentary debates Some social scientists have sought to explain the resurgence of nationalism and the spread of populism in recent decades but important questions remain and most of the scholarship has not adequately addressed the fusion of nationalism and populism It fails to examine the combination of populism and nationalism comparatively especially the contrast between the more progressive and leftist versions such as those in Latin America and the more traditional conservative varieties that are gaining strength in Germany the United Kingdom and the United States This interdisciplinary collection by experts on Europe and the Americas fills this void The volume examines various experiences with populist nationalism and offers theoretical tools to assess its future Some chapters are in depth country case studies and others take a broader perspective but all open the door for meaningful comparison **The Evolution of Liberal Arts in the Global Age**

Peter Marber, Daniel Araya, 2017-03-16 Advanced and developing countries across the globe are embracing the liberal arts approach in higher education to foster more innovative human capital to compete in the global economy Even as interest in the tradition expands outside the United States can the democratic philosophy underlying the liberal arts tradition be sustained Can developing countries operating under heavy authoritarian systems cultivate schools predicated on open discussion and debate Can entrenched specialist systems in Europe and Asia successfully adopt the multidisciplinary liberal

arts model These are some of the questions put to leading scholars and senior higher education practitioners within this edited collection Beginning with historical context international contributors explore the contours of liberal arts education amid public calls for change in the United States the growing global interest in the approach outside the United States as well as the potential of liberal arts philosophy in a global knowledge economy **The Planetary Emergency** Kent D. Shifferd,2021-01-13 Earth and its inhabitants face an unprecedented crisis the human caused destruction of the planet s life support systems Deteriorating climate bringing super storms mass forest fires melting glaciers droughts extreme heat and rising seas a decline in food production soil loss water pollution and declining fisheries all threaten the future of life on earth with a looming extinction event not seen for 60 million years Beginning in the 17th century we developed a civilization based on radical materialism exploitation of natural resources and the myth of endless economic growth For all its technological wonders this hypercivilization has proven unsustainable This book explores ways we can create an ecocivilization compatible with the laws and limits of nature a new way of living already developing with new technologies new forms of social organization and a new story about ourselves and the Earth *Archaeology Outside the Box* Hans Barnard,2023-05-15 Archaeology Outside the Box makes contemporary archaeology germane to the general public as well as to researchers in other disciplines In thirty one richly illustrated chapters a wide variety of projects is presented by an international group of anthropologists archaeologists architects and artists These aim to broaden the applicability of archaeology by reflecting on archaeological remains in novel ways or by addressing contemporary concerns with archaeological theory and research methods Demonstrating the fascinating and pertinent nature of archaeology the authors go far beyond its definition as a discipline that unearths objects of ancient material culture Many chapters also provide arguments relevant to the soul searching discussions currently taking place within archaeology worldwide and accelerated by the Black Lives Matter movement and the recent Covid 19 pandemic The Great Surge Steven C. Radelet,2015 The Great Surge tells the remarkable story of this unprecedented economic social and political transformation It shows how the end of the Cold War the development of new technologies globalization courageous local leadership and in some cases good fortune have combined to dramatically improve the fate of hundreds of millions of people in poor countries around the world Most importantly The Great Surge reveals how we can fight the changing tides of climate change resource demand economic and political mismanagement and demographic pressures to accelerate the political economic and social development that has been helping the poorest of the poor around the world Amazon com
