**Hemodiafiltration** Menso J. Nubé, Muriel P.C. Grooteman, Peter J. Blankestijn, 2015-11-10 This book gives a complete description of online hemodiafiltration in five sections. It is unique in the systematic and complete way in which hemodiafiltration is described. Each chapter is completed by a point to point summary of essential information in a separate text box. Part of the book is dedicated to the theoretical background of convective clearance. In this part safety issues and quality control is reviewed especially on the quality of water for dialysis and substitution fluid as well as equipment both dialyzers and machines with which this treatment can be performed. As recently the results of several randomized controlled trials were available the effect of hemodiafiltration on hard clinical end points mortality and morbidity is discussed in detail. This has not been done before as the most recent book/journal on hemodiafiltration was published in 2011 before the results of the 3 randomized controlled trials were published. Furthermore the methodological quality of the trials is discussed by an expert in order to help the readers in their judgment of the trials. Part of the book concentrates on the effect of the treatment on several biomarkers and uremic toxins. Several clinically relevant issues are discussed separately such as the prescription of anticoagulation during the treatment, drug prescription and clearance for patients treated with hemodiafiltration and hemodynamic stability. Finally a practical guide on how to perform the treatment is provided. In this unique section seemingly simple but important details of hemodiafiltration treatment are discussed such as the importance of needle size for blood flow rates, the difference between filtration fraction and substitution ratio, the different targets that can be set and how to reach them. As most literature is mainly focused on theoretical issues this unique feature really will help the field to perform hemodiafiltration and answer practical questions.

**Nephrology Worldwide** José A. Moura-Neto, José Carolino Divino-Filho, Claudio Ronco, 2021-03-03 This book presents contributions from leading international experts in the field of nephrology. Each chapter is independent and discusses nephrology in the author's country including the history of nephrology, development, kidney disease epidemiology, clinical nephrology, dialysis practice in acute and chronic renal failure settings, hemodialysis, hemodiafiltration, peritoneal dialysis, pediatric nephrology and kidney transplantation. In addition the book covers topics such as the job market for nephrologists, reimbursement, nephrology education and the number of professionals in the private and public sectors. With 53 chapters and more than 300 authors from all continents offering a unique perspective on nephrology practice it provides a much needed information source for nephrologists around the globe. The reader will be able to travel through Nephrology Worldwide a pleasant reading experience with not only relevant information and updated data but also a comprehensive look at the history, countries' peculiarities and a critical analysis of the scenario of nephrology and renal replacement therapy. A valuable resource for healthcare professionals and other stakeholders interested in learning about the status quo of Nephrology Worldwide. Both the failings and the successes are outlined in a way that should make this book a compelling read not just for the well informed renal physician but also for planners and

policy makers whose thinking and actions are integral to the way we practice medicine Sir Peter J Ratcliffe Nephrologist and 2019 Nobel Prize Winner More information on the Nephrology Worldwide initiative can be found at [www.nephrologyworldwide.com](http://www.nephrologyworldwide.com)
