Gassmann, Maximilian von Zedtwitz, 2013-06-29 Globalization has changed the face of R D Local knowledge clusters are not  
only tapped by multinationals but increasingly by small and medium sized companies as well Global R D networks speed up  
the evolution of technology and ask for new management concepts Modern communication technologies create the global  
village but customers become more fastidious and request their own specific products well localized well tuned into their  
present business Integrated technology is required to cope with these needs The danger of over engineering has never been

as great as today The question is frequently not whether some new features are technically feasible but whether customers are willing to accept and pay for it The first edition of Managing Global Innovation was sold out after few months clearly indicating the search for solutions to these challenges This second edition has been revised for clarity and actuality We have taken care to work in recent research findings as well as updating the case studies where appropriate This book is based on the growing importance of industrial global innovation and the lack of concepts to manage it For this book we conducted 320 interviews in 40 technology based highly internationalized companies including additional interviews in 1998 and 1999 for the second edition Our interview partners were R D managers and research directors from companies in Europe USA and Japan

**Doing Good with Technologies:** Katinka Waelbers, 2011-06-27 20th century technologies like cars the Internet and the contraceptive pill have altered our actions changed our perceptions and influenced our moral ideas for better and worse Upcoming technologies are bound to fulfill their own unique social roles How can we advance this social role so that it will support the good life and limit undesired changes This book explores whether we can take a forward looking responsibility to optimize the social roles of technologies In doing so the book discusses three issues first it aims to understand the social role of technologies second it explores what it means to accept responsibility for this social role and third it searches for some forward looking tools that help us to see how new technologies may influence human behavior In a rather unique approach this book combines the influential sociological research of Bruno Latour on the social impacts of technologies with the contemporary Aristotelianism of Alasdair MacIntyre
